Mode Descriptions

About This Product

Thank you for purchasing our Wireless Massage Pads. This is a stylish and innovative massage solution, with multiple modes and intensities, that offers a convenient portability and wireless operation. It has a built-in rechargeable lithium-ion battery, and a compact design, making it easy to store and transport. The P30 Wireless Massage Pads use the latest in TENS (Transcutaneous Electrical Nerve Stimulation) technology, the integrated design of the charging case has multiple functions, including remote controls for the selection of modes and intensity, along with built-in storage space for the massage pads and wireless charging, with the convenience of portability is the best modern case.

The Wireless Massage Pads include various modes for personal massaging techniques, they can promote blood flow and effectively relieve fatigue, stiffness, numbness, soreness, and other discomforts of the body.

Our Wireless Massage Pads can meet different needs of different people, including only health care, working fatigue care, and muscle relaxation after exercise, which is worth of choice due to its value proportion. Use our Wireless Massage Pads anytime, anywhere, whenever you want, and use them freely to take care of your body and health.

Product Features

1. Massage Pads - multi-function integrated design, utilizing wireless remote control technology, high definition video, knee control operation, simple, easy, and convenient to use.
2. The massage pads control case has both, storage and charging functions, each Pad has independent and automatic charging, with a long battery life that will ensure constant operation.
3. Equipped with dual buttons, massage different areas at the same time. Storage of pads and pads, a variety of ways
4. Professional massage techniques, using 6 different modes and a 10-level of intensity adjustments.

Operation Instructions

1. Open the box, take out the massage pads, place them horizontally, and align the position to connecting pins on the message button, it will just fit through a magnetic connection, and then tear off the transparent protective film on the message pads.

2. Use a clean slightly wet towel (damp but not dripping water), and wipe off the sweat on the skin surface where the pads will be placed.

3. Stick the massage pads firmly on the skin, and long press the switch button in the middle of the massage button to turn it on; when it is turn on, the buzzer will have prompt tone sounds and the indicator will light up. After the massage pads are placed on the skin, please turn the control box on, and then the massage pads will begin to charge directly, the message button will turned off after five seconds, entering into the power-saving mode.

4. The massage pads can be affixed to different parts of the body respectively, and they can be operated and controlled simultaneously by the wireless remote control to achieve a synchronized massage.

5. When opening the control box it will be in standby mode, the operation panel lights up in default mode, and the indicator will be turned on if the control light is on. If needed, turn off the control light, and it will need to be charged. The message button on the message pads can be adjusted with a button to help to easily select the message mode (1-6) and message intensity (0-10). Each mode has 15 minutes of operation, and after that, it will automatically be turned off.

A. The mode knob, increase the intensity clockwise, decreases the mode counter-clockwise, increases or decreases the mode step by step, there are 6 modes in total. When adjusting to mode 6 or mode 1, the user needs to long press the message button, the message button will generally adjust each time, the buzzer prompt once with the rotate knob. The mode knob, press up and down, also has the function of shutdown to stop dual pads massaging simultaneously for convenience.

5. The intensity knob, increase the intensity clockwise, decrease the intensity counter-clockwise, increases or decreases the intensity step by step, when adjusting to the highest or lowest intensity, the user re-adjusting the intensity knob, the intensity will not change, when the intensity knob is turned to the left or right with the rotate knob, there is 15 intensity adjustment. The intensity knob, press up and down, also has the function of pause. And it will turn off the intensity display flashes 3 minutes, entering into the待机 mode.

6. The working time of the message button and control box is 15 minutes, it will automatically calculate the time when it is working, and it will shut down automatically after working 15 minutes, every time the mode is changed, the working time of the message button and the control box is recalculated.

7. When completed the treatment, remove the massage pads, place it on the storage plate, and put it inside the control box for storage and recharge.

8. Low Voltage State:
A. When the battery is low, the indicator light will flash, and the buzzer will have a warning sound for 3 minutes. After that time, the control box will turn off automatically.

B. When the control box is in a low voltage state, the battery indicator on the screen will flash, the indicator light is flashing, and the buzzer prompt interval sounds for 20 seconds, it will shut down after 20 seconds. When the control box is in a low voltage state, it will not charge for the massage button, but the control box in the low voltage state cannot provide charging for the massage button.

C. Note: For your use, it is recommended to charge the control box for one hour. If it is not used for a long time, it is recommended to charge the control box at least. If it is not charged for one month, the battery performance will be deteriorated or damaged.

Care of the Massage Pads - The Magnetic Gel Pads

1. The magnetic gel pads uses high-quality raw materials with good viscosity and passes strict biocompatibility tests which are safe to apply on human skin.

2. The magnetic gel pads on the film is a reusable material, conventional cleaning can extend the service life of the magnetic gel pads, can be cleaned with water, and dried with reusable paper towels. After the magnetic gel pads are cleaned with water, it is recommended to dry the magnetic gel pads and then put the storage plate, to protect the magnetic gel pads for the next use.

3. Note: Please use water to clean the gel pads, and don't use medical alcohol or any other detergents or cloth paper to clean them, otherwise, the gel pads will be damaged.

3. The magnetic gel pads on film is consumable and can be used 20-40 times. Its service life varies according to washing frequency, skin condition, and storage state. When viscosity drops, please consider purchasing a new one. After that, please contact the dealer or purchase the magnetic gel pads of the same model and specifications.

Troubleshooting

Fault Phenomenon	Cause Analysis	Exclusion Method
Massage Pads cannot be charged	Battery power is exhausted Low battery voltage, low power	Please connect the adapter output interface to the message button Please connect the adapter output standard SVA to the charge.

Product Technical Specifications

Product Name: Wireless Massage Pads
Transmission and Storage Conditions: Ambient Temperature: 5°C~35°C
Relative Humidity: 30%~70%
Control Box: 3.7V1000MAH
Massage Battery: 3.7V100MAH
Wireless Control Frequency: 433 MHz
The Effective Working Distance: 3 meters
Normal Working Conditions:
Working Frequency: 433 MHz
Output Frequency: 433 MHz
Power Frequency: 50/60Hz
Rated Load Impedance: 500Ω, Tolerance ±10%
Rated Input Power: 5W, Tolerance ±10%
Massage Battery Life: 5000 times charge

DEEN SMART Warranty

1. Guarantee: If the product is under normal use and is not damaged due to normal wear and tear, or damage caused by abnormal use or damage to the product resulting in performance failure, during the warranty period, we will provide you with free repair or replacement service. If the product has an additional promise to you, you should ask the reseller to honor it, and Deen Smart is not responsible for the additional promise of the reseller.
2. Warranty Period: It's one year from the purchase date of the product (subject to the invoice date of the purchase of the product).
3. Warranty Claim Process: Customer must fill in the forms provided by Deen Smart Service Team with a detailed description of the issue and sufficient proof of purchase (the order number from our authorized resellers, pictures, and videos of the defective product). We will verify and reply you shortly. All unauthorized resellers, pictures, and videos of the defective product will not be accepted.
4. Note: If it is necessary to return a defective product for quality inspection before Deen Smart receives a product replacement.
5. Not Covered Under Warranty:
 - ① Purchases from unauthorized resellers or lost products.
 - ② Products without sufficient proof of purchase.
 - ③ Products that have exceeded the warranty period.
 - ④ Non-quality related issues.

● Free products.
● Repairs through 3rd parties.
● Repair or replacement of products (including, but not limited to, faulty, operating device improperly).
● Failure or damage caused by force majeure or unexpected events.

● Product rupture, rust and damage caused by contact or exposure to improper temperature, solvents, acids and alkalis, prolonged immersion in water or foreign matter intrusion, etc.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- ④ Reorient or relocate the receiving antenna.
- ⑤ Increase the separation between the equipment and receiver.
- ⑥ Connect the equipment into a circuit different from that to which the receiver is connected.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
