Start here

Get your watch set up in three simple steps.

- 1 Confirm your connection**
Make sure your watch is set up for cellular service with a COSMO Mobile membership plan.
- 2 Download the app**
Download the Mission Control companion app and set up your account.
- 3 Pair with the app**
Pair your watch with the Mission Control app to start using all of JrTrack's powerful features.

Confirm your connection

You'll need a COSMO Mobile membership plan to receive cellular service on your watch. Visit <https://ct.watch> or scan the QR code below to get started, or continue to the next step if you have already purchased a plan.

Download the app

Download the COSMO Mission Control app to the primary parent/guardian phone, available for both Android and iOS.

Pair with the app

Follow the instructions on the watch/app to set up an account and pair your watch. Congrats, you're all set!

- 1 Create an account**
Once you've downloaded the app, create a free account to track your watch and unlock all features.
- 2 Tap "Add device"**
In the app, tap "Add device" or:
- 3 Scan the QR code**
Power on your watch and follow the on-screen instructions. Use your app to scan the QR code displayed on your watch and finish pairing and setup.

On the app

Add approved contacts

JrTrack blocks all unknown numbers by default. Add a **Contact** (calls only) or a **Guardian** (call + text + GPS) to let JrTrack communicate!

☰ Main menu → All contacts → +

Set SafeZones

Get notified when your child enters or leaves an area you designate; home, school, a friends house, etc.

☰ Main menu → SafeZones → +

Set an alarm

Set alarms or reminders that your child will receive on their watch like “Wake up” or “Feed the dog!”

☰ Main menu → Activity center → Alarms → +

Set school mode

Prevent distractions during school or any time you want. **School mode** only allows the watch to tell time and activate **SOS mode**.

☰ Main menu → Activity center → School mode → +

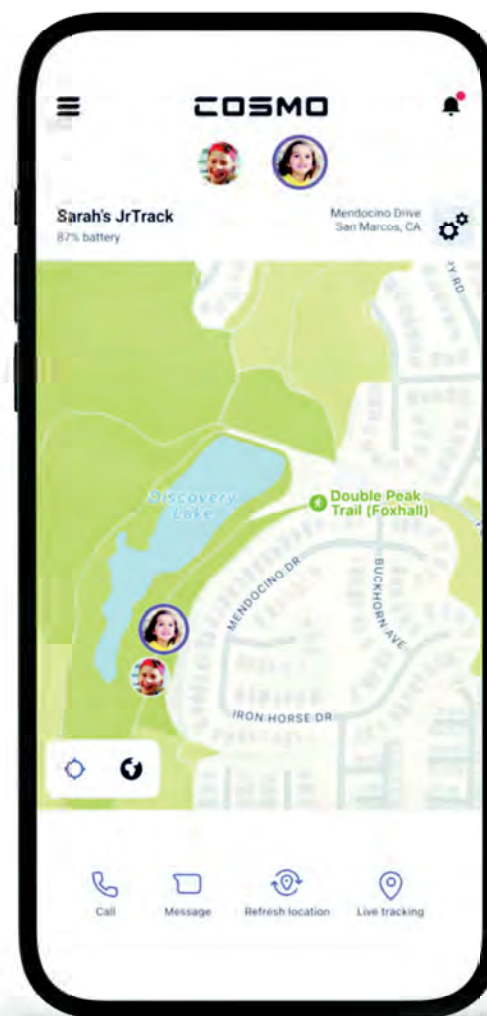

Set step goals

Build healthy habits by setting daily step goals.

☰ Main menu → Activity center → Step counter → +

Ready for adventure!

Get the most out of your JrTrack by exploring these features & tips.

On the watch

Change ringtones/volume

Manage all your JrTrack’s sound settings in one place on your watch! You can mute, adjust the volume, and set your favorite ring or text tone!

⚙️ → Device settings → Sounds and volume

Change wallpapers

Make JrTrack your own by choosing a home screen wallpaper from the library of fun preloaded options. Check for new designs with each software update!

SOS mode

If your child needs help, they can quickly & discreetly activate SOS mode. It immediately alerts the primary Mission Control app account and begins updating location every 30 seconds. Activate SOS on the watch by **tapping the power button twice**. Calls will not ring while SOS is active and will be automatically picked up.

⏻ x 2

Emergency calling

JrTrack is equipped with optional 9-1-1 emergency calling, which will appear on the watch’s calling contact list. To enable or disable this option, head to Device settings on your watch.

⚙️ → Device settings → Emergency calling

FCC compliance statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC SAR statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End user must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The portable device is designed to meet the requirements for exposure to radio waves established by the Federal Communications Commission (USA).

These requirements set a SAR limit of 1.6 W/kg averaged over one gram of tissue. The highest SAR value reported under this standard during product certification for use when properly worn on the body and head.

These requirements set a SAR limit of 4.0 W/kg averaged over ten grams of tissue. The highest SAR value reported under this standard during product certification for use when properly worn on the extremity.

This equipment should be installed and operated with minimum distance 10mm between the radiator and your body.

Note: Battery of smartwatch is not replaceable.
