Main Specification

Size:	111.6x59.6x36.6mm
Weight:	Around 61g
Switch:	Kailh GM8.0
Sensor:	PAW3370
Max DPI:	19000
Default DPI:	400-800-1200-1600-3200-4000-7200-19000DPI
IPS:	400ips
Acceleration:	50g(Max)
Polling rate:	125-500-1000Hz
Interface:	USB 2.0
Battery type:	Li-ion Polymer Battery
Battery capacity:	500mAh
Charging time:	Around 2h
Input:	5VDC 0.5A
Battery:	3.7VDC 500mAh

CAUTION

1. Keep the battery dry.
2. Avoid locating the battery terminals near metallic object.
3. Do not short-circuits and avoid metallic or water come into mouse to cause battery short
4. Use computer USB and specified cable to charge the mouse

SHENZHEN F&G ELECTRON CO., LIMITED
 Bldg 6, Tongfang Creative Park, Shajing, Bao'an District, Shenzhen, China.

Rating:
 Input: 5VDC, 0.5A
 Battery: 3.7VDC, 500mAh

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
