

User Manual

Instruction: This is a car kit with wireless remote function for kids to build and play. It can be driven forward, backward, leftward and rightward. It requires assembly. Kids will improvise their science interests and solving problems skill with the kit.

*Extra component needed: 5 AA batteries(not included).

Important: Please check all components after opening the package before starting. If any missing parts are found, please contact us ASAP.

CHOKING HAZARD

This product contains small parts, please keep it away from the children under 3 years.

Note:

- 1, Wires connection point means where the wires is connected. Please note the the corresponding terminal on the Receiving Panel.
- 2, The color of the wires may differ from the actual items.
- 3, If you have any difficulties, please contact support@jkorigin.com.

Questions & Answers:

1. What is the maximum remote controlling distance of the unit?

2-5 meters. Please avoid obstacles between remote and receiver on the car when operating, and using brand new batteries ensures longer distance.

2. Why does the unit move very slowly?

- i, Use brand new batteries for both the car and the remote;
- ii, Check the gears, axles, and steering if they are assembled too tightly to move.

3. Why does the unit not working when assembled?

- i, Check if the batteries are installed correctly;
- ii, Make sure all gears, axles, and steering are assembled not too tightly to move.
- iii, Check the wire connections including the circuit and the wire connector.

[IMPORTANT: WIRE CONNECTOR IS THE MOST COMMON REASON]

When using the wire connector to connect wires, please do clamp only the metal part instead of the rubber part of the wires, especially for the motors' thinner wires. Otherwise, it would be a circuit break and car will not work.

If the unit is still not working, please contact us as soon as possible.

We always prove great warranty and our policy is to make our customers happy.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment
