### FAQ

#### 1. The computer does not display the USB symbol when transferring files.

A: Since the device is 32-bit Android system, the computer cannot display the USB symbol. However, you can open "Computer" or "My Computer" in your computer to view the disk name "AGP-T06" and continue the transmission.

#### 2. The computer reminded that the format is not supported during the transmission of files.

A: Due to system reason, some formats may cause the computer to pop up "format not supported" window when transferring files. In fact, they can be supported. When this window pops up, please select "Yes" and "Execute the operation on all files". The transmission will continue without appearing this window.

#### 3. The navigation bar will disappear after open some applications.

A: When the navigation bar disappears, you can check whether the navigation bar is hidden. Steps: Settings > Navigation bar > Hide navigation switch, and select Close. If

there is no problem in the navigation bar setting, you can pull down from status bar to open the notification bar, and the navigation bar will be appeared. You can choose to exit and return.

**4. Some video formats cannot be opened in the built-in video software?**

A: The built-in video software of this device has limited decoding capability. It can download third-party video software for playback. In addition, files in rmvb format are copyright protected, so this device cannot support this format.

RM510, BLK A, Qi Xing Chuang Yi Gong Chang,  
District 28, BaoAn,Shenzhen, China.

Federal Communications Commission (FCC) Statement. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received,

including interference that may cause undesired operation. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide Reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: Changes or modifications made to this device not expressly approved by Mambate US Inc may void the FCC authorization to operate this device. Note: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

**RF exposure statement:**

The transmitter must not be colocated or operated in conjunction with any other antenna or transmitter. This equipment complies with the FCC RF radiation exposure limits set forth for an uncontrolled environment. The installation and use of this product are not restricted.
