

WoneNice 1D
Wireless barcode scanner
Manual Guide

***32-bit high-speed CPU *25 language settings**

Please charge the scanner at least for 30 minutes on first use.

Please keep this instruction for reference in the future.

If you have any question or concern about the operation of the scanner, please contact us at following Email:

service@wannishi.com

Specification

TYPE	Distance		Memory
2.4G	≤100m		100000 barcodes
Working current: 3.5Vx40mA			Standby current: 18uA-5mA
Working time: 3 to 10 days			Charging power: 5V-400mA
Scanner parameters:			
Scanning type: bi-directional			Light source: 650±20nm VLD
Scanning width: 30cm			BER : 1/20million
Printing Contract: >25%			Indication: Buzzer & LED
Trigger Mode: Button, Continuous, Auto-Induction (Optional)			
Depth Of Field	3mil	2mm-100mm	CPU: ARM 32-bit Cortex
	10mil	2mm-350mm	Resolution: 3mil
	15mil	5mm-500mm	Decoding speed: 300/sec
	30mil	10mm-800mm	
Scanning angle: Angle of rotation±30°, inclination± 45°, declination ± 60°			
Anti-interference: No influence working under strong light and sunshine			
Decode Capability: UPC/EAN、Code128、Code39、Code 39Full ASCII、Coda bar、industrial /Interleaved 2 of 5 Code93、MSI、Code11、ISBN、ISSN、China post、GS1 Databar、Code32、etc.			
Button life: 8000,000 times			laser life: 12000 hours
Drop test: 2.0m			Interface: USB, USB-COM
Certificate : CE, FCC, RoHS, IP54			

■How to use the scanner ?

The scanner has been paired with the receiver, and set up already.

Step1: Power on the scanner by pressing the button. The buzzer has a triple beeps, the blue light on the top of scan will be on. (If the buzzer doesn't make a sound and the blue light is off with the red light flashes three times. Please charge the scanner at least for 30 minutes.)

Step2: Insert the USB receiver into the USB port of computer, The USB receiver's light will be on.

Step3: Open text,put the cursor in. Scan 1D bar code to see if the bar code can be uploaded.

If the bar code does not display, please set up the scanner again according to the following steps.

1. Scan the follow code "restore default"

2. Scan the follow code "match the receiver"

3. Scan the follow code "instant upload mode"

4. Scan the follow code "USB_HID"

5. Open text,put the cursor in. Scan any bar code to see if the bar code can be uploaded.

General Settings-1

Restore defaults(restore factory settings)

Match(match the scanner and the receiver)

■ Matching Operation

Plug the receiver to your computer, when it start to work ,Match the scanner and the receiver by scan the "Match" Barcode.

(1) Matching successfully, the buzzer rang " Di-da-di", "DI-di-di".

(2) Matching failed, the buzzer rang " Di---en".

■ Network Mode : One to one , More to one

► One to one —one scanner to one receiver

1, plug the receiver to your computer

2, scan the "Match" bar code to Match the receiver

► More to one —several scanner to one receiver

If you have 2 scanners: scanner A, scanner B,

1, Plug the receiver to your computer

2, Match for the scanner A: A scan the "Match" Barcode.

3, Unplug the receiver and Plug the receiver again.

4, Match for the scanner B: B scan the "Match" Barcode.

After that ,2 scanners can transmit the data to the receiver.

Working Mode

■ Two upload mode: Instant upload mode、storage mode.

► Instant upload Mode: Instant upload data to your computer

Instant upload Mode

(1) Upload successfully: The blue light flashed and the buzzer rang " Di ".

(2) Upload failed: The red light flashed and the buzzer rang " Di---en".

► Storage Mode : Scan and store barcode inside the scanner, and uploaded the data to your computer when you need it.

Storage Mode

 Show total storage (Show total number of memory)	 Upload Data (Upload Data to your computer)
 High upload speed -default	 Low upload speed

Zero clearing (clear all data in scanner)

1, Save successfully: The blue light flashed and the buzzer rang " Di-en "

2, Save failed: The red light flashed and the buzzer range " Di---en", This indicates that there was not enough memory to save the bar code. Please upload the saved bar code by scanning "Upload Date" and then clear the Memory by scanning "Zero cleaning" .

3, Upload completed: the buzzer rang " Di-do-en ".

Power and Standby Setup

Battery Reserve (show battery level)

Set the time for automatic shutdown	
 50 seconds shutdown	 2 minutes shutdown-Default
 5 minutes shutdown	 30 minutes shutdown

Battery level indication

1. The scanner starts, when the buzzer rang “Di-di-di” and the blue light is on with no red light flashing, it indicates that the battery is sufficient
2. The scanner starts, when the buzzer rang “Di-di-di” and the blue light is on with the red light flashes three times, it indicates that the battery less than 30%, please charge the scanner as soon as possible
3. The scanner starts, when the buzzer doesn't make a sound and the blue light is off with the red light flashes three times. It indicates that the battery less than 20%. The scanner enters the low battery protection mode. Please charge the scanner at least for 30 minutes before using
4. Press the button, the scanner does not respond. Please charge the scanner at least for 30 minutes. If the scanner still cannot start, this indicates that the battery is broken and needs to be replaced.

LED tips during charging

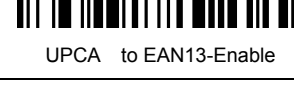

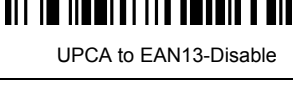

Plugged the USB cable into the USB port of computer

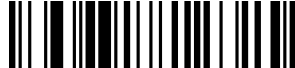

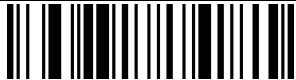

1. Charging mode: the blue light is on with the red light flashing
2. Charging completed: the blue light is on and the red light goes out
3. Micro-current charging: the blue light off and the red light flashing (Note: This is battery protection phase, please do not use it in this condition)

General Settings-2

Capital & lowercase	
 <p>All Capital</p>	 <p>All lowercase</p>
 <p>Swap capital/lowercase</p>	 <p>Cancel capital/lowercase settings</p>

Bar code reverse color setting	
<p>In the actual bar code application, some bar codes are printed in different colors, or even reversed.</p> <p>In this case, it is recommended to enable this function.</p>	
 <p>Reverse-Enable</p>	 <p>Reverse-Disable</p>

Insert and delete character

 Insert character	 Delete character	
 Save settings	 Clear settings	
 Prefix	Start add or clear data after barcode, setup by barcode in ASCLL Barcode Table	 Suffix
Barcode type(bar code data 068000-068018)		
 All type	 UPCE	 UPCA
 EAN8	 EAN13	 ISBN/ISSN
 Code39	 Code128	 Code93
 Coda bar	 Interleaved 2 of 5	 industrial 2 of 5
 MSI	 Code11	 China post
 GS1D	 GS1L	 GS1E
 Code32	Don't scan bar code type by default all bar code type	
Save the setting. Data Group (Different data group settings can take effect all the same time)		
 Data group 1	 Data group 2	 Data group 3
 Data group 4	 Data group 5	 Data group 6
 Data group 7	 Data group 8	Don't scan data group set of barcode first group by default

Insert or delete character operation for example

In the process of setting, scan the irrelevant barcode, the scanner will exit setting status

Example 1: Insert Character:123456789(code128)

Insert Ab before barcode	Insert Cd after the third digit of the barcode	Insert Ef after barcode
1. Insert Character		
2. All barcode type		
3. Data group 1		
4. Before barcode	003 ETX	After barcode
5. 065 A	067 C	069 E
6. 098 b	100 d	102 f
Each data group can insert within 10 characters		
7. Save Settings		
Setup result		
Ab123456789	123Cd456789	123456789Ef
Remove of insert character setting, please scan in turn	Insert character	Clear settings

1. Can set different bar code type. make this setting to this kind of bar code is effective
2. Can set different data group. make different setting take effective at the same time.

Example 2: Delete character: 123456789 (Code128)

Delete one digit before barcode	Delete 2 digit after the third digit of the bar code	Delete three digit after barcode
1. Delete character		
2. All barcode type		
3. Data group 1		
4. Before barcode	003 ETX	After barcode
5. 001 SOH	002 STX	003 ETX
6. Save settings		
Setup result		
23456789	1236789	123456
Remove of delete character setting, please scan in turn	Delete character	Clear settings

1. Can set different bar code type, make this setting to this kind of bar code is effective.
2. Can set different data group, make different setting take effective at the same time.

Frequently ask question

Question: Press the key, the red laser appear and then goes out, but there is no bar code display in the input box?

Answer:

1. The USB receiver has not plugged into the computer USB port, please make sure that the USB receiver has been fully plugged into the USB port.
2. The USB port of the computer is out of condition, please plugged the USB receiver into the USB port of another computer to test
3. The USB receiver is not matched with scanner yet, or the scanner is set to "storage mode" or "USB Virtual COM", please unplugged the USB receiver and plugged it again, then scan the following barcode in turn, "Restore defaults", "Match", "Instant upload mode", "USB_HID",
4. The cursor is not in the input text box, please make sure the cursor is in the input box where you want to upload the barcode.
5. If the USB receiver indicator goes out or flasher, it indicates that the receiver is broken. Please contact us at service@wannishi.com

Question: Press the button, the scanner is not laser?

Answer:

1. The battery less than 20%. The scanner enters the low battery protection mode. Please charge the scanner at least for 30 minutes before using.
2. The laser engine is damaged and needs to be replaced.

Question: Read the barcode, the barcode data will be lost?

Answer: Slow down the HID speed of the scanner.

Question: Barcode characters is wrong?

Answer:

1. Set the scanner keyboard nations with using the keyboard.
2. Set more slow HID speed (in Mac)

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.
