Solder Board-Component View 1	

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) component, identified as 'View 2'. The board is rectangular and features several surface-mounted components, including a small integrated circuit (IC) and various passive components. Two red and black wires are connected to the board. The component is placed on a blue textured surface next to a black ruler with white markings, showing dimensions in millimeters. The ruler is oriented vertically, with the 0 mark at the top and the 100 mm mark at the bottom.
Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) component, identified as 'View 3'. The board is rectangular and features several surface-mounted components, including a small integrated circuit (IC) and various passive components. Two gold-colored SMA connectors are visible on the left side of the board. The component is placed on a blue textured surface next to a black ruler with white markings, showing dimensions in millimeters. The ruler is oriented vertically, with the 0 mark at the top and the 100 mm mark at the bottom.

Solder Board-Component View 4	 A photograph of a small green printed circuit board (PCB) component, labeled 'WTH23X07165998W', positioned next to a black L-shaped ruler. The ruler has white markings in millimeters and centimeters. The PCB is rectangular with various electronic components, including two gold-colored SMA connectors on the top edge, a central integrated circuit, and several smaller components. The background is a light blue textured surface.
Solder Board-Component View 5	 A photograph of the same green PCB component from a different angle, showing the bottom side. It features two gold-colored SMA connectors on the right edge and a DC power input pad on the left. The component is placed next to the same black L-shaped ruler on a light blue textured background.

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) component, likely a Wi-Fi module, positioned next to a black ruler for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The PCB is rectangular with various electronic components, including a small white label. Two red and black wires are connected to the top of the board. The background is a light blue textured surface.
Solder Board-Component View 3	 A photograph of the same green PCB component from a different angle, showing the underside. It features two gold-plated SMA connectors on the left side. A white label with technical specifications and a QR code is visible. The component is placed next to a black ruler for scale, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The background is a light blue textured surface.

Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, labeled 'View 4', placed on a blue textured surface. The component is rectangular and populated with various electronic components, including a central integrated circuit, several surface-mount components, and two gold-plated SMA connectors on the top edge. A black L-shaped ruler is positioned to the left and bottom of the component for scale. The ruler has white markings in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Solder Board-Component View 5	 A photograph of the same green PCB component, labeled 'View 5', showing the reverse side. The reverse side features a large, complex copper pad layout for surface-mount components, with two gold-plated SMA connectors visible on the top edge. A black L-shaped ruler is positioned to the left and bottom of the component for scale, with white markings in millimeters and centimeters.

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) component, labeled 'View 2'. The board is rectangular and populated with various electronic components, including integrated circuits, resistors, and capacitors. It is positioned next to a black ruler with white markings for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). Two red and black wires are connected to the top of the board.
Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) component, labeled 'View 3'. This board is smaller and more densely populated than the one in View 2. It features a prominent white label with a QR code and the text 'S117070G'. The board is positioned next to a black ruler with white markings for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). Two gold-colored SMA connectors are visible on the top edge of the board.

Solder Board-Component View 4	 A photograph of a small green printed circuit board (PCB) component, labeled 'View 4'. The component is rectangular and populated with various electronic components, including two gold-plated SMA connectors on the left side, several integrated circuits, and surface-mount components. It is placed on a blue textured surface next to a black L-shaped ruler for scale. The ruler has white markings in millimeters and centimeters.
Solder Board-Component View 5	 A photograph of the same green PCB component, labeled 'View 5', showing the reverse side. This view highlights the solder joints and the underside of the components. It is placed on the same blue textured surface next to the same black L-shaped ruler for scale.
