EUT Housing and Board View 1	
Solder Board-Component View 1	

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) component, likely a power management IC, with four red and black wires soldered to its top. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows dimensions in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) component, likely a power management IC, with two gold-plated SMA connectors soldered to its top. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows dimensions in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).

Solder Board-Component View 4	 A photograph of a small green printed circuit board (PCB) component, labeled 'WTH23X07165998W', resting on a blue textured surface. The component is rectangular and populated with various electronic components, including two gold-plated SMA connectors on the left side, several integrated circuits, and surface-mount components. A black L-shaped ruler with white markings in millimeters is placed next to the component for scale. The ruler shows the component is approximately 25mm wide and 15mm high.
Solder Board-Component View 5	 A photograph of the same green PCB component from a different angle, showing the underside. The component is rectangular and populated with various electronic components, including two gold-plated SMA connectors on the right side, several integrated circuits, and surface-mount components. A black L-shaped ruler with white markings in millimeters is placed next to the component for scale. The ruler shows the component is approximately 25mm wide and 15mm high.

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) component, labeled 'View 2'. The component is rectangular and features several surface-mounted components, including a small integrated circuit (IC) and various passive components. It is positioned next to a black ruler with white markings, which shows dimensions in millimeters. The component is placed on a blue textured surface. Two red and black wires are connected to the top of the component.
Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) component, labeled 'View 3'. The component is rectangular and features several surface-mounted components, including a small integrated circuit (IC) and various passive components. It is positioned next to a black ruler with white markings, which shows dimensions in millimeters. The component is placed on a blue textured surface. Two gold-colored SMA connectors are visible on the top of the component.

Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, labeled 'View 4', showing its soldered side. The board is populated with various electronic components, including two gold-plated SMA connectors at the top, a central integrated circuit, and several surface-mount components. It is placed on a blue textured surface next to a black L-shaped ruler with white millimeter markings for scale.
Solder Board-Component View 5	 A photograph of the same green PCB component, labeled 'View 5', showing its reverse side. This view displays the solder pads and traces on the underside of the board. The two gold-plated SMA connectors are visible at the top. The board is positioned on a blue textured surface next to a black L-shaped ruler with white millimeter markings for scale.
