## Setup Photos

### For BTEK250512031A01-T01

<p><b>Conducted Emissions at Mains Terminals (150kHz-30MHz)</b></p>	 <p>A photograph showing a conducted emissions test setup. A power cord is plugged into a power strip on a wooden table. A power line coupler is connected to the power strip. A power line analyzer is connected to the power line coupler. The setup is on a wooden table in a laboratory setting.</p>
<p><b>Radiated Emissions (30MHz-1GHz)</b></p>	 <p>A photograph showing a radiated emissions test setup. A power cord is plugged into a power strip on a white table. A power line coupler is connected to the power strip. A power line analyzer is connected to the power line coupler. The setup is in a chamber with white walls and black cross patterns.</p>
<p><b>Radiated Emissions (Above 1GHz)</b></p>	 <p>A photograph showing a radiated emissions test setup. A power cord is plugged into a power strip on a white table. A power line coupler is connected to the power strip. A power line analyzer is connected to the power line coupler. The setup is in a chamber with white walls and black cross patterns. A blue cable is connected to the power line analyzer.</p>
