Safety and Precautions

Please strictly observe the following rules, violation of these rules may be dangerous to use this product safely and effectively be sure to read the following information before using.

Please do not place and use the product in direct sunlight or in high temperature or abnormally low temperature environment in summer, which will cause the product deformation and damage to the battery of electronic devices.

Please do not place and use the product in a wet environment. It is not waterproof, please be careful not to let the liquid in the lamp soaking in water and damp may cause internal circuit operation failure.

Please place the product in a stable place to prevent the damage of the product and its electronic devices caused by violent shock and fall. Please do not press the product or place heavy objects on the product to prevent the rupture of the book and avoid personal injury.

Please do not place the product in the place where the dust is dirty and corrosive gas is generated. Otherwise, the normal use of the product will be affected.

Please do not use chemical solvent to wipe the surface of the product. If the shell is dirty, please use a soft cleaning cloth dipped in a little pure water or weak acid cleaner to wipe.

Please do not disassemble and open the product without permission (only by the company or authorized maintenance center maintenance personnel), so as not to cause the product scrap.

Please keep the product and its accessories out of the reach of children to avoid physical injury and damage to children.

Please do not place the product near the magnetic field to avoid magnetic interference.

Please use a 5V charger to charge in a well-ventilated place with normal temperature.

During the charging process, the product will heat slightly, which is normal.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
