Main Page

The main page has 5 applications: Music, Folder, Recorder, Bluetooth, and Settings.

MUSIC

Under"Music" there are options: Last Played, All Songs, Artists, Albums, Favorites, etc.

Recording

One–key recording: Press the "record" key in the power–on state to start recording, and press the "record" key again during the recording process to save the recording.

Recordings library: Select the recording file to be played, and press the "play" key to play the current recording.

Recording bit rate: WAV format (PCM linear recording) has the following three bit rates: 512kbps/1536kbps/3072kbps.

Note: Noise reduction is not supported for 1536kbps and 3072kbps.

Recording scene: including "closeure, meeting, interview, teaching, station", choose according to your own scene.

Recording segment: It can be set to be off or on, including 30 minutes, 60 minutes, and 120 minutes are optional, and the recording file is automatically saved according to the set time length during the recording process.

Voice–activated recording: The voice control function can be set to off or on.

Note: After "Open Voice Control" is turned on, in the recording state, the machine will automatically sense the surrounding sound. When the surround–ing sound reaches a certain standard (about 60–65db), the machine will automatically record. If it is lower than the standard, it will automatically pause the recording. In important environments, it is recommended not to use this function.

Recording monitor: After turning it on, you can hear the sound being recorded in real time by plugging in the headphones during recording.

The recording monitoring function and the voice–activated recording cannot be effective at the same time; After recording monitoring is turned on, headphones must be plugged in when recording.

Timing recording: You can set the timing recording, turn on/off the "Timing recording", "start time", "finish time", and "timing cycle" 4 options.

Note: To enable this function, the time must be set to your time

BLUETOOTH
Switch between music mode and phone mode:
In the mode options, short press the "play" key to switch between music mode and phone mode.

Note: Bluetooth must be turned off when switching, otherwise the mode cannot be switched.

1. music mode: Use a Bluetooth headset/speaker to connect to the machine to listen to music playback and recording playback.

Select the "Bluetooth" option in the music Bluetooth mode, short press the "play" key to turn on the Bluetooth;

Select "Available Devices" – "Search Devices", search for the name of the Bluetooth device to be connected, and short press the "play" key to connect to Bluetooth.

"Paired Devices": Switch connected Bluetooth devices.

2.phone mode: After using the mobile phone to connect to the recorder, you can use the recorder to answer/hang up calls, calls and call recordings.

a. Select the "Bluetooth" option in the call mode, and short press the "play" key to turn on the Bluetooth;

b. When the bluetooth is on, use the bluetooth of the mobile phone to search for the device;

c. After the connection is successful, the machine automatically accesses the audio of the call, and when the mobile phone caller ID is displayed, the machine interface synchronizes the phone caller ID display;

d. Short press the "play" key to connect the call or long press the "play" key to hang up the call;

e. After connecting the phone, the machine will automatically record the call, short press the "record" key to end or start recording;

(Note: You can switch to other audio in the phone call interface)

The first line of the call recording interface is the call duration, and the second line is the recording time.

The call recording is in "Recorder" – "Recording Library" or in "Folder –> record", the file name has "phone".

Note:

In order to ensure the quality of the call, please ensure that the distance between the recorder and the mobile phone does not exceed 3 meters, and the distance between the recorder and you does not exceed 0.5 meters;

Temporarily support the call recording function of all Apple series and some Android phones;

If the bluetooth cannot be connected, please restart the phone and reconnect the bluetooth.

Folder

In the folder option, you can browse/play all music and recording files; after selecting a file, long press the "play" key to delete it.

Settings

Connect with PC

In the power–on state, connect the PC and the recorder with a USB cable.

When the main interface of the machine appears: transfer files and charging only interface, short press the "play" key to confirm the "transfer files" option.

If a green arrow appears in the lower right corner of the computer interface, it means that the player has been successfully connected to the computer.

If you select "Charge only", it will only charge and not connect to the computer.

How to deal with common problems

1. The player cannot be turned on.

Please check if the battery is exhausted, connect it to a computer or a charger to charge it and try to turn it on again.

2. No sound can be heard in the headset.

Please check if the volume is set to zero.

Please check that the earphones are properly inserted into the earphone jack.

3. Serious noise.

Please check that the plug of the headset is clean, dirt can cause noise.

Please check whether the music file is damaged, you can try to play other music files to confirm;

If the file is corrupted it may cause severe noise or skipping.

4. Can't connect with Bluetooth.

Please confirm that the Bluetooth device is paired;

Delete all connected devices, turn off the Bluetooth of the machine or restart the machine and try again;

Or restart the bluetooth speaker, bluetooth headset, mobile phone and try again.

5. Can't download files.

Please confirm whether the connection between the computer and the player is correct.

Please confirm whether the storage space of the internal memory is full.

Check if the USB cable is damaged.
