2. Check whether the receiver is correctly plugged into the USB interface of the computer

3. Confirm whether the receiver is normally recognized by the computer after being plugged in

When the wireless mouse moves slowly or fails, the following methods are recommended:

2. Do not let the USB receiver be adjacent to other wireless devices. Such as: WIFI, Bluetooth, microwave oven, etc.

3. Do not disassemble the mouse or USB receiver

4. If the mouse is operated on a metal surface, such as iron, aluminum, copper, etc., it will create a barrier for radio transmission, and extend the response time of the keyboard and mouse or cause the keyboard and mouse to temporarily malfunction.
