FCC and RED CAUTIONS (MODEL 8A.04.9.024.8320)

FCC
Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. FCC RF Radiation Exposure Statement:
- this Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter
- this equipment complies with RF radiation exposure limits set forth for an uncontrolled environment
- this equipment should be installed and operated with minimum distance 20 cm between the radiator & your body

NOTE
This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

RED
The product is in compliance with essential requirements and other relevant provisions of Directive 2014/53/EU. This product is allowed to be used in all EU member states.

Frequency bands	Maximum output power (EIRP)
2412 - 2472 MHz (2.4G WiFi)	5,42 dBm
2402 - 2480 MHz (BLE)	2,41 dBm
2402 - 2480 MHz (EDR)	-6,27 dBm

3 QUADRO FRONTALE
3a Morsetti alimentazione 12...24 V DC
3b I1...I8 morsetti ingressi digitali/analogici (0...10V) configurabili via IDE
3c Pulsante di RESET: Imposto il dispositivo in modalità bootloader. Premendolo due volte riavvia il dispositivo. (Premerlo con un utensile appuntito isolato)
3d Pulsante USER programmabile
3e LED di stato del contatto 1...4
3f Morsetti 1...4 di uscita a relè, contatto NO (SPST) 10 A 250 V AC
3g Morsetto di terra funzionale (ETH)
3h LED stato della porta Ethernet
3i Porta targhette 060.48
3j Morsetti per collegamento MODBUS RS485 (solo per versioni 8A.04-8310/8320)
3k USB-C per la programmazione e il data logging
3m Porta Ethernet
3n Porta per comunicazione e collegamento moduli ausiliari

INFORMAZIONI PER INIZIARE:
IDE
Per la programmazione di Finder OPTA 8A.04 è necessaria l'installazione di Arduino Desktop IDE. Per collegare l'8A.04 al computer, è necessario un cavo USB di tipo C. Questo collegamento fornisce anche alimentazione alla scheda, il LED potranno essere pilotati
<https://www.arduino.cc/en/Main/Software>
ARDUINO WEB EDITOR
Finder OPTA può funzionare anche con Arduino Web Editor, semplicemente installando un plug-in. Arduino Web Editor è utilizzabile online, quindi sarà sempre aggiornato con le ultime funzionalità.
<https://create.arduino.cc/editor>
https://create.arduino.cc/projecthub/Arduino_Genuino/getting-started-with-arduino-web-editor-4b3e4a
ARDUINO IOT CLOUD
Finder OPTA è supportato su Arduino IoT Cloud il che consente di registrare, rappresentare graficamente e analizzare i dati dei sensori, oppure attivare eventi e automatismi

NOTE
Se il dispositivo viene utilizzato in un modo non specificato dal produttore, la protezione fornita dal dispositivo potrebbe essere compromessa.

3k USB Type C for programming and data logging
3m Ethernet port
3n Port for communication and connection of auxiliary modules

GETTING STARTED GUIDE
Getting started - IDE
If you want to program your 8A.04 while offline you need to install the Arduino Desktop IDE. To connect the 8A.04 to your computer, you'll need a Type C - USB cable. This also provides power to the board, as indicated by the LED. <https://www.arduino.cc/en/Main/Software>
GETTING STARTED - ARDUINO WEB EDITOR
All Arduino boards, including this one, work out-of-the-box on the Arduino Web Editor, by just installing a simple plugin. The Arduino Web Editor is hosted online, therefore it will always be up-to-date with the latest features and support for all boards. Follow to start coding on the browser and upload your sketches onto your board.
<https://create.arduino.cc/editor>
https://create.arduino.cc/projecthub/Arduino_Genuino/getting-started-with-arduino-web-editor-4b3e4a
GETTING STARTED - ARDUINO IOT CLOUD
All Arduino IoT enabled products are supported on Arduino IoT Cloud which allows you to Log, graph and analyze sensor data, trigger events, and automate your home or business.

NOTE
If the equipment is used in a manner not specified by the manufacturer, the protection provided by the equipment may be impaired.

3k Port USB Type C pour la programmation et l'enregistrement des données
3m port Ethernet
3n Port de communication et raccordement de modules auxiliaires

GUIDE DE DEMARRAGE
Commencer avec IDE hors ligne
Si vous souhaitez programmer votre 8A.04 hors ligne, vous devez installer le Arduino Desktop IDE. Pour connecter le 8A.04 à votre ordinateur, vous aurez besoin d'un câble Type C - USB qui fournira également l'alimentation de la carte, comme indiqué par la LED. <https://www.arduino.cc/en/Main/Software>
COMMENCER AVEC ARDUINO WEB EDITOR
Toutes les cartes Arduino, y compris celle-ci, fonctionnent avec l'éditeur web Arduino, en installant simplement un plugin. L'Arduino Web Editor est hébergé en ligne, donc il sera toujours à jour des dernières fonctionnalités ainsi que du support en ligne. Pour commencer:
<https://create.arduino.cc/editor>
https://create.arduino.cc/projecthub/Arduino_Genuino/getting-started-with-arduino-web-editor-4b3e4a
COMMENCER - ARDUINO IOT CLOUD
Tous les produits compatibles Arduino IoT sont pris en charge sur Arduino IoT Cloud. Cela permet d'enregistrer, de représenter et d'analyser les données des capteurs, de déclencher des actions et automatiser votre maison ou votre entreprise.

NOTE
Si l'équipement est utilisé d'une manière non spécifiée par le fabricant, la protection fournie par l'équipement peut être compromise.

3j Anschlussklemmen für MODBUS RS485 Schnittstelle (Nur für Versionen 8A.04-8310/8320)
3k USB Typ C für Programmierung und Datenerfassung
3m Ethernet Anschluss
3n Anschluss für Kommunikation und den Anschluss von Zusatzmodulen

ERSTE SCHRITTE LEITFADEN
Erste Schritte - IDE
Wenn Sie Ihren 8A.04 offline programmieren möchten, müssen Sie die Arduino Desktop IDE installieren. Um den 8A.04 an Ihren Computer anzuschließen, benötigen Sie ein USB-Kabel Typ C. Damit wird das Board auch mit Spannung versorgt, was durch die LED angezeigt wird. <https://www.arduino.cc/en/Main/Software>
ERSTE SCHRITTE - ARDUINO WEB EDITOR
Alle Arduino-Boards, einschließlich dieses Boards, funktionieren sofort mit dem Arduino Web-Editor, indem Sie ein einfaches Plugin installieren. Der Arduino Web Editor wird online gehostet und ist daher immer auf dem neuesten Stand, mit den neuesten Funktionen und Unterstützung für alle Boards. Folgen Sie den Anweisungen, um mit dem Programmieren im Browser zu beginnen und Ihre Programme (Sketches) auf Ihr Board hochzuladen.
<https://create.arduino.cc/editor>
https://create.arduino.cc/projecthub/Arduino_Genuino/getting-started-with-arduino-web-editor-4b3e4a
ERSTE SCHRITTE - ARDUINO IOT CLOUD
Alle Arduino IoT-fähigen Produkte werden von der Arduino IoT Cloud unterstützt, die es Ihnen ermöglicht, Sensordaten zu protokollieren, grafisch darzustellen und zu analysieren, Ereignisse auszulösen, und Ihr Zuhause oder Geschäft zu automatisieren.

HINWEIS
Wenn das Gerät auf eine nicht vom Hersteller angegebene Weise verwendet wird, kann der durch das Gerät gebotene Schutz beeinträchtigt werden.
