Navigate to Date And Time on the main menu and press on the remote to confirm it,

which allows you to set system date and time.

Chapter 4 Common problems and solutions

Common problems and solutions:

- 1. The display screen is black and there is no display.
- 1) Please check that the device is connected to the power supply;
- 2) Please check the main board indicator.
- 2. The advertising machine has images but no sound
- 1) Check the audio cable is inserted into the PC audio output interface.
- 2) Check whether the audio cable is loose.
- 3) Whether the remote control is set to mute or adjust the volume too low.
- 4) Check whether the speaker wire interface of the driver board is loose.

If there is no problem, it may be caused by damaged speakers. Advertising machine needs to replace the speaker.

- 3. Advertising machine has sound but no image
- 1) Please check the connection of the video signal cable, whether there will be an image display in the remote control operation.
- 2) Please check whether the signal source selection is correct.

If there is no problem with the above, it may be caused by damage to the driver board. The advertising machine needs to replace the driver board.

- 4. The remote control cannot be operated
- 1) Please check whether the remote control has batteries installed.
- 2) Please check whether the remote control is aimed at the remote control sensor.
- 3) Please check the connection between the remote control sensor and the driver board.

If there is no problem with the above inspection, it may be caused by damage to the remote control sensor or damage to the driver board.

If the above situation occurs in the advertising machine, you can get in touch with our after-sales staff as soon as possible. We will give you the greatest help.

Warning:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user 's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.ct. The device has been evaluated to meet general RF exposurer equirement.
