Introduction to Bluetooth intercom connection operation:

After successful pairing, there will be a prompt of "intercom connection". After hearing the "dong" sound, the intercom call will start, and the intercom indicator light will remain on.

Intercom and backconnect: After two connected machines are turned on, both machines will automatically communicate and backconnect, or if one of the machines enters the intercom mode, the intercom indicator light will remain on for a long time.

Telephone answering: The two machines have successfully connected to each other through intercom, and Bluetooth is also connected to the phone. When a call comes in, it automatically switches to answering the phone. After hanging up, the intercom resumes.

Clear intercom pairing and restore factory settings: Turn on the phone without connecting Bluetooth and intercom, and press the volume up/down button for 5S. When you hear a "thud" sound to release, restore factory settings and clear all pairing information.

Using a machine to connect a third-party helmet Bluetooth earphone for intercom calls: After turning on, neither machine is connected to the phone Bluetooth. The intercom machine enters intercom mode when turned on, and the Bluetooth earphones enter Bluetooth mode when turned on. The two begin to connect. After successful connection, there will be a prompt for intercom connection. After hearing a "dong" sound, the intercom will begin
