

SIZE:31*23MM

FCC ID: 2AAFASY-E571-003-04
This device complies with Part 15 of
the FCC Rules. Operation is subject
to the following two conditions: (1)
this device may not cause harmful
interference, and (2) this device must
accept any interference received,
including interference that may cause
undesired operation.

The central control panel features a red LED indicator light at the top. Below it is a sliding switch labeled 'OFF' and 'ON', with a small black knob in the center. On either side of the switch are small icons of a car with arrows pointing left and right, indicating directional control. The panel is set against a black background with red and white diagonal hazard stripes at the top.

The left joystick is mounted on a silver-colored circular base. The joystick itself is black and has a rounded, ergonomic shape. It is positioned on the left side of the controller's main body.

The right joystick is mounted on a silver-colored circular base, mirroring the left joystick. It is positioned on the right side of the controller's main body.

The left trigger button is a black, circular button located on a yellow cylindrical stalk that extends from the bottom of the controller's main body.

The right trigger button is a black, circular button located on a yellow cylindrical stalk that extends from the bottom of the controller's main body.
