Applicant's declaration concerning RF Radiation Exposure

We hereby indicate that the product

Product description: WIRELESS REMOTE CONTROL

Model No: 60565XR

FCC ID: 2AAWR60565XR

The equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. The integral antennas used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter within the host device.

A safety statement concerning minimum separation distances from enclosure of the Product : **WIRELESS REMOTE CONTROL** will be integrated in the user's manual to provide end-users with transmitter operating conditions for satisfying RF exposure compliance.

The appropriate information can be drawn from the test report no: **HA230503-RA** and the accompanying calculations:

According to KDB 447498 D01 General RF Exposure Guidance v05r02, the 1-g SAR test exclusion thresholds for 100MHz to 6GHz at test separation distances of 50mm are determined by:

$[(\text{max. power of channel, including tune-up tolerance, mW}) / (\text{min. test separation distance, mm})] * [\sqrt{f(\text{GHz})}] \leq 3.0$ for 1-g SAR, where

Field Strength : 70.5 dBuV/m

Ant. Gain : 0.5 dBi; Ant Numeric Gain : 1.122018

max. power of channel, including tune-up tolerance:

$\{ [10^{(\text{Field Strength}/20)}/10^6] \times 3 \}^2 / 30 \times \text{Ant Numeric Gain} \} \times 1000 \text{ mW} = 0.003777 \text{ mW}$

FORMAR

Trusty Products, Inc.

137 South 8th Ave., #D, City of Industry, California, United States

Tel : 626-333-2221 Fax : 626-333-2466

min. test separation distance: 5 mm

Frequency: 0.433947 GHz

$(0.003777 \text{ mW}/5\text{mm}) \times \sqrt{0.433947 \text{ GHz}} = 0.000498 < 3$

Result of Calculation:

The result of calculation is far below 3 . Therefore, SAR test is not required.
