Safety Information

Please read and follow all instructions and safety guidelines in this manual.

MEDICAL

WARNING: This scale uses a harmless electrical current to measure body fat. Consult a healthcare professional before using the smart scale if you use electronic medical equipment such as a pacemaker.

- This scale should not be used to diagnose or treat any medical condition.
- Scale data should not be used as a substitute for medical advice from a healthcare professional.

GENERAL USE

- Check the scale before using. **Do not** use the scale if it is damaged in any way.
- **Do not** strike or bang on the scale.
- **Do not** use the scale if there is a crack on the glass. While tempered glass is stronger and fractures more safely than ordinary glass, it may shatter unexpectedly after developing a slight crack. If you see a crack, contact **Customer Support.**
- The glass platform is slippery when wet. **Always** make sure the platform and your feet are dry before stepping on for measurement.
- Place the scale on a hard, flat surface to avoid tipping.
- To weigh safely and accurately, stand with your feet shoulderwidth apart while on the scale.
- **Do not** stand on the edge of the scale or jump on the scale.
- Avoid standing on the scale for a long period of time, or when not measuring yourself.
- **Do not** overload the scale. Maximum weight capacity is 400 lb / 180 kg.
- Keep the scale in a cool area with low humidity.
- Keep the scale away from heat sources, such as ovens or heaters. Avoid temperature fluctuations.
- Store the scale in a horizontal position, not a vertical position.
- **Do not** use while charging. Remove the charging cable before using.
- This scale is not to be used by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Handle with care.

- Not for commercial use.
- Household use **only.**
- Product working altitude: 0~3000M.
- Product operating environment temperature: 5℃~50℃.
- Product operating humidity: 35%~70%.
- Pollution degree of the intended environment: 2 degree.
- Ingress Protection Rating: IP20.

BATTERY WARNING:

- Disposal of a battery into fire or a hot oven, or mechanically crushing in an explosion;
- Leaving a battery in an extremely high temperature surrounding environment, such as sunshine, fire, or hot surface, may result in an explosion or the leakage of flammable liquid or gas;
- A battery subjected to extremely low air pressure may result in an explosion or the leakage of flammable liquid or gas.
- **Do not** mix new and old batteries and Do not mix alkaline, standard (carbon-zinc) or rechargeable (ni-cad, ni-mh, etc.) batteries.

etekcity   Smart Body Composition Scale

Quick Start *Guide*

To download the free VeSync app, scan the QR code or search "VeSync" in the Apple App Store® or Google Play Store.
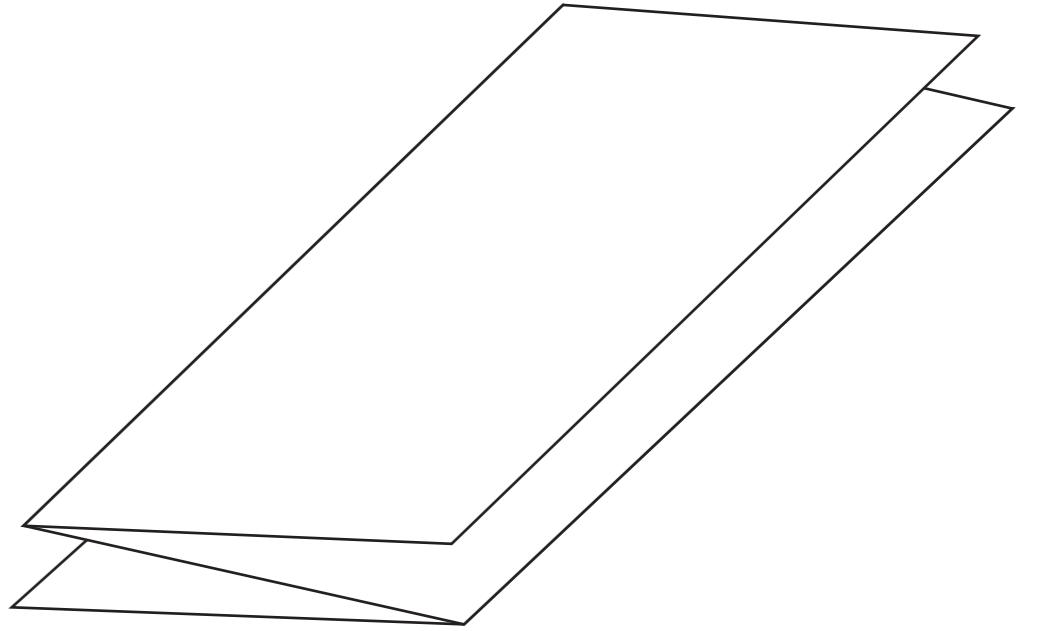

Note:
- Please make sure your firmware and software are up to date.
- The VeSync app is continually being improved and may change over time. If there are any differences, follow the in-app instructions.

1   App Store | Google Play

2 Open the VeSync app. **Log In** or **Sign Up.**

3 Make sure your phone has Bluetooth® turned on.

4 Tap **+** in the VeSync app.

5 Select Smart Scale — Step on the scale and select your smart scale from the device list.

6 In-app Instructions — Follow the in-app instructions to complete setup.

Note:
- You can change the scale's in-app name and icon at any time in the smart fitness scale settings.
- When the scale display turns off, the scale's Bluetooth will disconnect and go into auto-off mode. However, when the scale display lights up and the app is opened to the device page, the scale will reconnect to Bluetooth.

Note:
- You can tap on the product categories to jump to different sections of the device list.
- Make sure to choose the right device model (you can find it on the back of the scale) or it will lead to a connection failure.

Display Messages

Icon	Description
(battery)	Flashes when the scale needs to be charged.
(bluetooth)	Flashes when Bluetooth is disconnected. Stays solid when connected.
Err	Weight exceeds 400 lb / 180 kg. Use a scale with a higher weight capacity.

Specifications

Name	Smart Fitness Scale
Model	EFS-C671-WUST
Weight Capacity	400 lb / 180 kg
Increments	0.1 lb / 0.05 kg
Weight Units	lb / kg
Platform	Tempered Glass
Battery	300mAh Li-ion Battery
Input	5.0V ⎓ 500mA (USB Type-C Charging)
Dimensions	11.8 x 11.8 x 0.9 in / 30 x 30 x 2.4 cm
Operating Systems	iOS® 12.0+ or Android™ 6.0+

Using Your Smart Scale

1. Place the scale on a hard, flat surface (not a carpet or mat).
2. Step on the scale, then step off. Wait for the display to show "0.0" before weighing.
3. Place dry, bare feet on the scale's conductive areas. Please stay on the scale until the screen shows your weight 3 times. If the scale is connected to the VeSync app, you can view additional body metrics in the app.

Note:
- If you are pregnant or have an internal medical device such as a pacemaker, turn on Zero-Current Mode in the VeSync app.
- To measure your baby or pet, tap ⊕ in the VeSync app and follow the in-app instructions for weighing. Baby Mode will not measure other body metrics and will only measure weight and BMI.

B.	Display	E.	USB-C Charging Port
C.	Conductive Areas	F.	Unit Button

Tips

- If you're wearing shoes, the scale can only measure your weight. To measure other body metrics, such as body fat, step on the scale with **bare feet**.
- This scale uses a harmless electrical current to measure body fat. Consult a healthcare professional before using the smart scale if you use medical electronic equipment such as a pacemaker.
- If the scale has been moved or flipped upside down, it needs to be cleared.
  1. Step on the scale until digits appear on the display, then step off.
  2. The scale will show "0.0" when cleared.
- If your scale won't connect to the VeSync app:
  - Allow VeSync to access Bluetooth® in your phone settings.
  - Make sure to choose the right smart scale model (you can find it underneath the scale).
  - Make sure the scale is not connected to any other phone or app.
  - The scale should only be connected to your phone via the VeSync app. Please do not connect it in your phone's Bluetooth settings.
  - Turn off VPN if you are using one.
  - Download and open the newest version of the VeSync app.
  - Make sure your phone's operating system is iOS® 12.0+ or Android™ 6.0+.
  - For Android users, please allow the app to access nearby devices in your phone's settings.
- If you have other scale problems, try restarting the scale. Use a safety pin or paper clip to press the Restart button near the charging port to reset the scale. All saved data and configurations will be deleted.

Read the manual for further instructions, helpful tips, troubleshooting, and more.
