

User Guide

Version: 1.0

Date: 3/26/2014

Introduction

The Audio player delivers 1-2 channels of custom licensed content for Background music, business messaging and music on-Hold services. The RR2 features ultra low power consumption and industrial-graded reliability. It is designed for extremely quiet operation and is ultra-compact for space-constrained environments.

Specifications

- Small Form Factor Plastic chassis for space-constrained applications
- RCA Audio ports for Stereo or dual Mono output.
- Internal speaker for monitoring or testing playback
- Gigabit Ethernet for wired networking
- WiFi (B/G/N) with External Antenna for WiFi connectivity
- 9V DC Power Adapter
- 192x64 Pixel LCD screen for Status and Settings
- 6 Front mounted buttons for controlling playback
- Fanless design for near silent operation with minimal maintenance
- Dimensions: 160mm x 95mm x 55mm

Package contents

Item	Qty	Description
1	1	RR2 Media Player
2	1	AC Power Adapter
3	1	6' Stereo RCA cords
4	1	10' Network Cable
5	1	WIFI Antenna

Connections

The WiFi antenna connects to the connector labeled "WIFI"

The network cable connects to the port marked "LAN" The other end connects to your internet router or switch.

The RCA cords connect to the ports marked L and R. For Stereo locations, the other ends of the cables connects to the amplifier. If your location is using 2 mono stations, the "R" (Red) connector connects to the amplifier. The "L" (White) connector would go to the phone system for on-hold applications or to another amp for a 2nd zone of audio.

The AC adapter plugs in to the "Power" port on the back of the player.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept

any interference received, including interference that may cause undesired operation.

changes or modifications not expressly approved by the party responsible for compliance

could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a

Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are

designed to provide reasonable protection against harmful interference in a

residential installation. This equipment generates, uses and can radiate radio

frequency energy and, if not installed and used in accordance with the

instructions, may cause harmful interference to radio communications. However,

there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is

encouraged to try to correct the interference by one or more of the following

measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF warning statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.
