

SwipeSense Portable Dispenser User Manual

Empower healthcare workers to clean their hands wherever they go with a light, portable hand sanitizer dispenser. Recyclable gel cartridges make refills a snap, and an interchangeable clip system ensures the device fits comfortably anywhere.

Electronics within the dispenser capture usage data and transmit it to each user's badge based on proximity. Each device is anonymous, and will work with any badge worn by a healthcare worker. In other words, users can pick any portable dispenser to use throughout their shifts.

When the portable dispenser is low in battery it sends a warning to the Web-Application.

The figure above shows the communication between a Portable Dispenser and a Badge.
