**Model N0.: T6**

**6 A-Xis Gyroscope  
Air-mouse + Keyboard  
Quick Start Guide**

Air mouse is multiple-axes hand-held pointing device for computer .  
It is able to transform the space movement of the human hand in the air into an accurate displacement of the screen pointer.

Its movement detection technology relies on a multi-axes motion detector encapsulated in the device that analyze the rotation of the wrist of the wrist or elbow .

In conclusion this is the perfect device to control the accurate movement of a screen pointer in an intuitive way .

Limiting within 20 meters communication range ,active frequency hopping mechanism to avoid confliction with WiFi ,users can control the mouse pointer in the air shown in the screen in freely roaming once they push the thaw-button .

Besides,the device is also equipped with qwerty keyboard and multimedia buttons and low power indicator indicator .

With USB Dongle it can be used in windows , Mac, Linux and Android OS .

### \*\*\*What in the Packing?

- 1)please let the Air mouse with horizontal on the desk .
  - 2)And wait for 5 seconds ,after you can use it .

Thank for your choose our products!!!

## **Federal Communications Commission (FCC) Statement**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**Note:** The manufacturer is not responsible for any radio or tv interference caused by modifications to this equipment. Such modifications could void the user's authority to operate equipment.
