Re: Confidentiality Request for FCC ID 2ABDV-0929 Equipment Authorization

To whom it may concern:

Catha Maeve LLC and its affiliates (the “Company”) hereby requests, pursuant to Sections 0.457 and 0.459 of the FCC Rules, the confidential treatment of certain documents included in connection with the Company’s equipment authorization submission for product FCC ID 2ABDV-0929 (the “Device”). The requested confidentiality treatment is as follows:

Short-Term Confidentiality

The Company requests that the following documents be kept confidential for 180 days from the date of grant of the equipment authorization for the Device:

- User Guide
- EMC Test Setup Photos
- Bluetooth Setup Photos
- External and Internal Photos of Device

These documents contain business sensitive information regarding the Device (including the features set) that is not shared with third parties other than subject to non-disclosure agreements. Disclosure of this competitively sensitive information prior to Company’s marketing of the Device would among other things reveal Company’s confidential product roadmap and cause competitive harm to Company if made known prior to Company’s marketing of the Device.

Long-Term Confidentiality

Company requests that the following documents be kept confidential in perpetuity:

- Block diagram
- Schematics
- Operational description

These documents contain highly confidential and proprietary information, including technical and design information, regarding the Device. Company would not share or disclose this information even after marketing and commercial launch of the Device. If competitors were to have access to this information, it would assist their strategic product development to our detriment, and negatively impact Company's ability to compete in a very crowded product space.

Thank you for your support of Company's request for confidential treatment as described above. Please feel free to contact me should any questions arise.

Sincerely yours,

Christine Behne (f/k/a Sheeley)
