

Download & Register App

Search and download "Wherecom" App from App store or Google Play Store.

1. Open the App and tap "Register" to start account registration.
2. A valid email account is a must as a verification code will be sent to the email address.
3. Click "Get code" to send the verification code and check your email for the code. Enter the verification code and other personal info to complete the registration.

Note: Please enter a valid email and verification code (received via email).

SIM Card Installation

1. Pull the SIM card tray on the left side of the watch.
2. Put the NANO SIM in the tray.
3. Put the card tray into the watch.
4. Restart the watch.

Binding Watch

1. Switch on the device. After boot up, the device will display the Binding QR code.
2. Open the App and click Add Device.
3. Please allow the App to access phone camera.
4. Scan the QR code on the device.
5. The first user who scan and bind the device will be set as the Administrator to the device by default. Administration will have full access to all the settings.

Two-way Communication

Slide the screen to enter "Phonebook", select one contact to make phone calls. Press power button to end phone calls.

Voice Chatting

Access "Voice Chatting", hold mic to make voice message and release to send out.

Pedometer

All-day activity tracking, track your steps.

SOS

Hold the SOS button for three seconds to start the SOS. An alarm together with the kids' position as well as a 30-second voice recording will be sent to parents' phone.

Taking Photos

With 2MP front camera, the device supports photo-taking. User can store the photos in the album, browse or delete freely.

Video Call

Video call can only be initiated from the App.

Making Friends

Enter the friends mode in the main interface. Make sure the devices are within 2m range to each other. Shake the device to make friends with others.

Change the Theme

1. Press the home screen for 3 seconds to switch to other theme.
2. Left slide or right slide the screen to choose the theme.
3. Click to confirm a theme which you prefer.

Specifications.

1.3 inch TFT screen with Capacitive touch
2M Pixel Camera
Battery life up to 2 days Product
Splash proof
Wrist size up to 62mm diameter
Supports 3G (WCDMA) & 4G(FDD) network.
3G WCDMA: B1/B6/B19, FDD: B1/B3/B8/B19/28B
Nano SIM card
App supports iOS 7.0 & Android 4.3 above
USB Charging: 5V, 1A.
Wireless Connectivity: WCDMA, 4G, WiFi, Bluetooth, GPS

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

SAR tests are conducted using

Standard operating positions accepted by the FCC with the smart watch transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the smart watch. While operating can be well below the maximum value, in general, the closer you are to a Wireless base station antenna, the lower the power output. Before a new model smart watch is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC. Tests for each smart watch are performed in positions and locations (e.g. at the wrist and worn on the body) as required by the FCC.

Next to mouth and Wrist-worn mode Operation

This device was tested for typical next to mouth and wrist-worn operations. To comply with RF exposure requirements, for next to mouth mode, a minimum separation distance of 10mm must be maintained between the user's head and the handset, including the antenna, for wrist-worn mode, a minimum separation distance of 0mm must be maintained between the user's wrist and the watch, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.

Non-compliance with the above restrictions may result in violation of RF exposure guidelines.
