

## RF Exposure Analyzed Report

The device IP Gigabit Video Phone model LIP-9071 is low power device, the MPE is near 0mw/cm<sup>2</sup>, but certified WiFi and Bluetooth dongle may perform SAR test, and the test distance at 5mm.

So the simultaneous construction RF exposure should be 0 (NFC MPE ratio)+1.2(W/kg)/1.6(W/kg)(WiFi or Bluetooth dongle SAR ratio) <1

Note the Max dongle SAR should be under 1.2W/kg, otherwise FCC PAG should be submitted under KDB447489 D02

A handwritten signature in black ink, appearing to be "Chang-Won Yang".
