1285 Walt Whitman Rd  
Melville, NY 11747

To whom it may concern:

WIFI NIU Tune up and Safe Margin Information

The FCC approved maximum power settings will be hardcoded in the firmware. Settings will be corrected to have a safety margin tolerance of +/- 0.5 dB for the possible deviations in RF performance. Electrolux doesn't plan to implement individual tune up of the NIU.

Sincerely Yours,
