

ShenZhen Hipad Telecommunication Technology Co., LTD.

USER MANUAL

MM5008A/ Olé!

Precautions

1. This user manual has been specially designed to guide you through the functions of your mobile phone.
2. The company follows the strategy of sustainable development, so we will reserve the right to modify the product function, interface and the shape without informing the user.
3. When there are some discrepancies between the description and the actual product, the actual product shall prevail.
4. Please power off following the correct steps, do not remove the battery when power on or charging, to avoid adverse consequences, such as data loss, etc.

Guidelines for Safe and Efficient Use

To safely and effectively to use your product, please read this information in depth before using your phone. The following suggestions may help you to follow the warranty terms and prolong its service life.

To avoid the damage of hearing, please answer the call or lower the volume in advance before placing your phone to ear.

Using your product (phone), charger and other accessories

- Turn off your product where noticed and prohibited (including airports, gas stations and hospital, etc.).
- Keep your product and its accessories away from small children.
- Do not expose your product and its accessories to liquid or moisture or humidity.
- Do not expose your product to extreme high or low temperature.
- Do not expose your product to open flames or lit tobacco products.
- Do not paint your product.
- Do not drop, throw or try to bend your product.
- Do not store your product with PC-disk, credit-card, travel-card or other metallic objects. Otherwise information stored in the disk or credit-card may be affected by your product.
- Do not expose your product or battery in the areas where temperature may exceed 60°C, such as windowsill or behind direct sunlight glass plate, etc.
- Do not attempt to disassemble your product, do not unauthorized service your product and its accessories.
- Do not use any battery or chargers that are not approved by the phone manufacturer, to avoid potential dangers.

- Wipe your product with a slightly damp or anti-static cloth. Do not use dry or electrostatic cloth to wipe your phone.
Do not use chemicals or detergents containing grinding ingredients, otherwise it may damage the casing.
- LCD parts belong to the fragile and easily scratched parts that need to pay attention to store. Do not hit or crush your product. Do not store your product with sharp objects, to avoid scratching the screen or your phone.
- If your phone, battery, charger or other accessories are not working properly, bring your product and related accessories to the nearest authorized professional maintenance department, the staff will assist you, and arrange repair if necessary.

Inflammable and explosive area

- Turn off your product and comply with all the safety signs or instructions whenever you in and around the inflammable and explosive area (e.g., refueling points). Otherwise your product will produce slight spark or radio wave and could cause explosions or fire.

Aircraft

- Turn off your product or switch to the airplane mode, and comply with all the safety signs or instructions when you on the plane. In such places, the waves emitted from your phone can interfere with aircraft navigation equipment and control system, and make the automatic control device receive the wrong information, do the wrong operation, case danger, even make the plane crash.

Hospital

- Turn off your product and comply with all the safety signs or instructions when you in the hospital. Otherwise the waves emitted from your phone will affect the proper functioning of the electronic medical equipment and the cardiac pacemaker, and then endanger the patient's life.

Personal Healthcare Device Class

- Mobile phones may affect the operation of cardiac pacemakers, hearing aid, implanted Cochlear and other medically implanted equipment. Avoid placing the mobile phone in the breast pocket. When using the mobile phone, place it at the ear opposite the pacemaker. Keep the minimum distance of 15cm between the mobile phone and the pacemaker throughout. If you have any reason to suspect that interference is taking place, immediately turn off your mobile phone, move it to the far place, then contact your cardiologist for more information. If you use any other personal medical device or implanted equipment, e.g. hearing aid, consult the manufacturer of your device.

Driving

- Always give full attention to driving and pull off the road and park before making or answering a call. If local laws and/or regulations permit drivers to use a Hands Free solution, we recommend that you use 'Interior Hands Free' solutions intended for use with your mobile phone only.

Child safety instructions

- Keep your phone and all accessories out of the reach of small children. Do not allow children to play with your mobile phone or its accessories, they could hurt themselves or others, or could

accidentally damage the mobile phone or its accessories. Your mobile phone or its accessories may contain small parts that could be detached and cause a choking hazard or serious injury if swallowed.

Used battery

- The used battery should never be placed in common municipal waste. Please consult local regulations for disposal of waste electronics products to get the correct disposal ways.

Use of original accessories

- Charger:** Connect the AC power adapter to designated power sources as marked on the product. Make sure the cord is positioned so that it will not be subjected to damage or stress. To reduce risk of electric shock, unplug the unit from any power source before attempting to clean it. The AC power adapter must not be used outdoors or in damp areas. Never alter the cord or plug.
- Battery:** We recommended that you charge the new battery (or one that has not been used for a long time) for 12 hours at least and less than 24 hours before you use your mobile phone for the first time. The battery can only be charged in temperatures between -5°C and +45°C. When the battery is fully charged, unplug the adapter or the charging cable.
A new battery or one that has not been used for a long time need several fully charged and discharged to reach its best performance. Use only our company branded original chargers to charge your battery. Do not short-circuit the battery. To avoid explosions, never dispose of batteries in a fire.

KEY	Function
MENU	Press the key, you can access the menu options interface.

Accessibility: You can set your phone to end a call when you press [Power] etc.

About phone: Using the function, you can view the Status message, Battery power level, Legal information, Model, Versions, etc.

Warning

Specific Absorption Rate (SAR) information

SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value, in general, the closer you are to a wireless base station antenna, the lower the power output.

Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC. Tests for each phone are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC.

For body worn operation, this model phone has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that contains no metal and that positions the handset a minimum of 1cm from the body.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and

can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

--Reorient or relocate the receiving antenna.

--Increase the separation between the equipment and receiver.

--Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

--Consult the dealer or an experienced radio/TV technician for help.

FCC Caution.

§ 15.19 Labelling requirements.

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

§ 15.21 Information to user.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

§ 15.105 Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information:

This UTCOM TECHNOLOGY CO.,LIMITED. meets the government's requirements for exposure to radio waves.

The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue.

Device types: LAUNCH (FCC ID: YPVITALCOMTIN) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.382W/kg and when properly worn on the body is 0.587W/kg This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the handset, including the antenna.. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
