

## **Shandong EasyNet Information Technology Co., Ltd**

2014-1-27

The Smurfs Model No.: H1  
FCC ID: 2ABRP-IVCARH1

1. How does this device operate  
This device operating frequency range from 88.1 to 107.9MHz , Total 199 channels  
Channel separation is 100KHz.
2. Provide information on the device and its antenna  
The device is a low power communication device (FM Transmitter) The EUT use  
integral antenna (Without any antenna connector).
3. How is it installed  
This is usually installed in car and antenna is fixed with EUT.
4. What test procedure was used  
According to ANSI C63, 10-2009 and FCC Part 15.239
5. If test in a car, How was it configured/tested?  
N/A
6. Was the tuning range properly verified?  
The test lab should indicate in the report that the tuning controls were manually  
adjusted to verify maximum tuning range. EUT was adjusted to work at the selected  
channels: 88.1 MHz to 107.9MHz. The EUT will not allow operation below 88.1 MHz  
and will not allow operation above 107.9 MHz.
7. Was the bandwidth properly tested with maximum audio input?  
Emissions from the intentional radiator shall be confined within a band 100 kHz wide  
centered on the operation frequency. The 100 kHz band shall lie wholly within the  
frequency range of 88.1– 107.9MHz. Setup the EUT and simulators as shown in the  
report. Enable RF signal and confirm EUT active. Modulate output capacity of EUT up  
to specifications.

Sincerely,

A rectangular box containing a handwritten signature in black ink. The signature is written in a cursive style and reads "Wenmiao Yang". Below the signature, there are two horizontal lines.

Wenmiao Yang
