How to mirror

1. Install receiver:

Connect the wireless display receiver to your screen and power it on.

* Press the button to rotate the screen to portrait mode.

2. Plug and mirror:

Plug the transmitter to laptop or mobile and wait for mirroring automatically.

* The **BC-1** model (**Type-C**) can fast charge device via **Type-C** port, while the **H-1** (**HDMI**) model requires charging via the **Type-C** connector

3. Stop and restart:

Press the button on the transmitter to stop mirroring and restart mirroring.

* If unable to mirror, please pair your transmitter to the receiver again.

OTA Upgrade

1 Enabling receiver SSID and PSK

- (1) Connect the receiver to the monitor and plug the USB end into a power source.
- (2) Use a paperclip to press and hold the reset hole on the HDMI end of the receiver. The monitor will display the SSID and PSK of the receiver.

2 Connecting receiver to a network

- (1) Turn on the Wi-Fi settings page on your phone or computer.
- (2) Connect to the SSID of the receiver and enter the PSK displayed on the monitor to complete the connection.
- (3) Open a browser and enter : 192.168.203.1
- (4) Enter the settings page, turn on the internet settings, and connect the receiver to the network.

3 Using web settings for upgrades

- (1) Check the icon  ...  on the monitor, verify the receiver is connected to the network.
- (2) After connecting the receiver to the network, return to the settings page and select "Upgrade."
- (3) The system checks the current version status. If there is a newer version, agree to update to complete the system upgrade.

Transmitter

- Antenna :1T1R(Loaded)
- Wi-Fi :5Ghz
- Chip :8360D
- Interface :HDMI or Type-C

Receiver

- Antenna :1T1R(Loaded)
- Wi-Fi :5Ghz
- Chip :8268H
- Interface :HDMI or Type-C

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

SAR statement (Transmitter)

This device meets the government's requirements for exposure to radio waves. This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government. The SAR limit set by the FCC is 1.6W/Kg. For body-worn operation, this device has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and positions the device a minimum of 0mm from the body. RF exposure compliance with any body-worn accessory that contains metal was not tested and certified. and use of such body-worn accessory should be avoided. Accessory available in market and must be used to keep use distance 0mm from EUT to body-worn operation.

RF Exposure Statement (Receiver)

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20cm the radiator your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.
