7.8 AUTOMATICALLY DISCONTINUE TRANSMISSION

7.8.1 LIMIT OF AUTOMATICALLY DISCONTINUE TRANSMISSION

The device shall automatically discontinue transmission in case of either absence of information to transmit or operational failure. These provisions are not intended to preclude the transmission of control or signaling information or the use of repetitive codes used by certain digital technologies to complete frame or burst intervals. Applicants shall include in their application for equipment authorization to describe how this requirement is met.

7.8.2 MEASURING INSTRUMENTS

See list of measuring equipment of this test report.

7.8.3 TEST RESULT OF AUTOMATICALLY DISCONTINUE TRANSMISSION

While the EUT is not transmitting any information, the EUT can automatically discontinue transmission and become standby mode for power saving. The EUT can detect the controlling signal of ACK message transmitting from remote device and verify whether it shall resend or discontinue transmission.
