The image shows a custom-built electronic device housed in a black rectangular enclosure. The top of the enclosure is open, revealing a custom PCB. The PCB is populated with a PIC16F877 microcontroller (28 pins), a power supply section with a yellow electrolytic capacitor and several diodes, and various other electronic components. A yellow measuring tape is placed next to the enclosure for scale, indicating its dimensions are approximately 15 cm wide and 10 cm high.
