## **Attestation**

We, Block, Inc., attest that this device with FCC ID: 2AF3K-SPD3 complies with the Dual Client (6CD) device protocol and restrictions as below.

**1. Protocol Attestation**

- a. this device will only associate and connect with a low-power indoor Access Point, subordinate device, or standard access point and never directly link to any other client devices
- b. this device will always initiate transmission under the control of a low-power indoor AP, subordinate, or standard AP, except for brief communications before joining a network. These quick messages will only occur if the client has detected an indoor AP, subordinate, or standard access point operating on a channel. These brief messages will have a time-out mechanism such that they will not continually repeat the request if they do not receive a response from an AP.
- c. this device, when associated and connected with a low-power indoor access point, subordinate or standard access point device, will operate at a power lower as advertised by the indoor access point, subordinate, or standard access point:
  - i. lower or equal to the power advertised by the low-power indoor access point or subordinate and never above the maximum output power allowed by the FCC grant for clients associated with indoor clients or subordinates.
  - ii. lower than 6 dB below the power of the standard access point advertised.

**2. Device restrictions:**

- a. Control of or communications with unmanned aircraft systems is prohibited, including drones.
