

The image shows a technical drawing of a device back cover. The cover is rectangular with rounded corners. A curved line at the top indicates the hinge or opening of the cover. The main body of the cover is white. In the center, there is a rectangular area defined by a dashed line, indicating the laser engraving area. This area contains the following text and symbols:

FCC ID: 2AFP2-TB20

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation

Below the text, there are four symbols: the CE mark, the FCC mark, the recycling symbol, and the WEEE symbol (a crossed-out wheeled bin). Below these symbols, the text reads:

DC5V,2A DC9V,1.67A

Made in China

At the bottom of the engraving area, there is a small rectangular slot.

To the right of the main drawing, there is a detailed view of the engraving area. It shows a rectangular area with a width of 28mm and a height of 10.8mm. The area contains the same symbols and text as the main drawing, but the text is smaller and the symbols are more compact.
