

## Warning

WARNING: This device contains chemicals known to the State of California to cause cancer, birth defects or other reproductive harm.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The highest SAR value for the model phone as reported to the FCC when tested for use at the ear is 1.14 W/kg and when worn on the body, as described in this guide, is 1.18 W/kg (Body- worn measurements differ among phone models, depending upon available accessories and FCC requirements).

While there may be differenced between the SAR levels of various phones and at various positions, they all meet the government requirement.

LEX727 (Le Pro3):  
FCC 1g SAR Limit (1.6 W/kg)  
Head: 1.14 W/kg (1g)  
Body : 1.18 W/kg (1g)  
HAC: M3/T3

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model is on file with the FCC and can be found under the Display Grant section of [www.fcc.gov/oet/ea/fccid](http://www.fcc.gov/oet/ea/fccid) after searching on FCC ID for;

LEX727 (Le Pro3): 2AFWMLEX727

For body worn operation, this phone has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and positions the handset a minimum of 10 cm from the body. Use of other accessories may not ensure compliance with the FCC RF exposure guidelines. If you do not use a body-worn accessory and are not holding the phone at the ear, position the handset a minimum of 10 cm from your body when the phone is switched on.

This mobile phone complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this

device must accept any interference received, including interference that may cause undesired operation.

Obey all laws and regulations regarding use of the device while driving, on aircraft or in other situations where use is restricted.

This device should not be submerged in liquids or subjected to excessive moisture, dust, dirt, sand, shock, vibration or other extreme environmental conditions.

Warming is normal during use. Cease operation if the device seems becomes hot and allow the device to cool before resuming use

Do not disassemble, modify, attempt to repair, change the battery or use the device with unapproved accessories as this may result in damage to or destruction of the device and will void the warranty.

Keep the device clean and dry. Do not use the device if it is wet.

Lithium-ion batteries are volatile and may burn or explode with improper use.

Only use chargers and charging cables supplied with or approved for use with this device. Use of unapproved chargers or charging cables may void the warranty.

Optimal charging will occur between the temperature range of 32F (0C) to 104F (40C).

Do not expose the device to fire or other sources of extreme heat.

Do not expose to excessive flexing or mechanical shock.

If the screen is cracked or otherwise damaged, discontinue use immediately to avoid injury or further damage to the device until repaired. Use of a phone with a cracked screen may expose you to sharp edges or loose particles that may cause injury. Contact the manufacturer for repair service in the event of a screen crack

To minimize the possibility of damage to the device, it is highly recommended to use the protective case that comes with the device

Avoid contact with any liquid seeping from the battery. If contact occurs, thoroughly rinse the affected area with clean water.

Children should only use this device under the supervision of a responsible adult.

Obey all laws and local or venue restrictions regarding taking photographs and recording sound with this device. LeEco disclaims any liability resulting from your failure to do so.

This mobile phone has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiated radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the device and receiver.

Connect the device into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

**Caution:** Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device may emit radio waves that can affect operation of nearby electronics including, but not limited to, cardiac pacemakers, hearing aids or other medical devices. Consult your physician if you have questions about your personal use and obey all posted signs when using this device in medical facilities or other public location.

**WARNING:** Use earphones or ear buds with this device at your own risk. These may reduce your ability to hear surrounding sounds. Do not use in situations where failure to hear sounds in your environment could be dangerous. Volume in excess of 85 decibels and for extended periods of time may cause permanent hearing damage.

Keep the provided instructions for future reference.

Failure to follow warnings may result in electric shock, fire, property damage, bodily injury, or death.

Dispose of the device and accessories in accordance with national and local environmental protection regulations.

### **ISED Notice**

This device complies with Innovation, Science and Economic Development Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:

(1) this device may not cause interference, and

(2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR Innovation, Sciences et

Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

- (1) l'appareil ne doit pas produire de brouillage, et
- (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

IC: 21242-LEX727

### **ISED Radiation Exposure Statement**

This EUT is compliance with SAR for general population/uncontrolled exposure limits in RSS-102 and had been tested in accordance with the measurement methods and procedures specified in IEEE 1528 and IEC 62209. This equipment should be installed and operated with minimum distance 10 cm between the radiator and your body. This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.

Cet appareil est conforme aux limites d'exposition DAS incontrôlée pour la population générale de la norme CNR-102 Innovation, Sciences et Développement économique Canada et a été testé en conformité avec les méthodes de mesure et procédures spécifiées dans IEEE 1528 et IEC 62209. Cet appareil doit être installé et utilisé avec une distance minimale de 10 cm entre l'émetteur et votre corps. Cet appareil et sa ou ses antennes ne doivent pas être co-localisés ou fonctionner en conjonction avec tout autre antenne ou transmetteur.

The device is going on be operated in 5150MHz-5250MHz frequency range. It is restricted indoor environment only.

### **Hearing Aid Compatibility (HAC) regulations for Mobile phones**

In 2003, the FCC adopted rules to make digital wireless telephones compatible with hearing aids and cochlear implants. Although analog wireless phones do not usually cause interference with hearing aids or cochlear implants, digital wireless phones sometimes do because of electromagnetic energy emitted by the phone's antenna, backlight, or other components. Your phone is compliant with FCC HAC regulations (ANSI C63.19- 2011). While some wireless phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise and phones also vary in the amount of interference they generate. The wireless telephone industry has developed a rating system for wireless phones to assist hearing device users in finding phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that are rated have the rating on their box or a label located on the box. The ratings are not guarantees. Results will vary depending on the user's hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone

successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

This phone has been tested and rated for use with hearing aids for some of the wireless technologies that it uses. However, there may be some newer wireless technologies used in this phone that have not been tested yet for use with hearing aids. It is important to try the different features of this phone thoroughly and in different locations, using your hearing aid or cochlear implant, to determine if you hear any interfering noise. Consult your service provider or the manufacturer of this phone for information on hearing aid compatibility. If you have questions about return or exchange policies, consult your service provider or phone retailer.

M-Ratings: Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings.

T-Ratings: Phones rated T3 or T4 meet FCC requirements and are likely to be more usable with a hearing device's telecoil ("T Switch" or "Telephone Switch") than unrated phones. T4 is the better/ higher of the two ratings. (Note that not all hearing devices have telecoils in them.)

Your phone meets the M3/T3 level rating.

Hearing devices may also be rated. Your hearing device manufacturer or hearing health professional may help you find this rating. For more information about FCC Hearing Aid Compatibility, please go to <http://www.fcc.gov/cgb/dro>.
