

## APPENDIX C - RF EXPOSURE EVALUATION

### Maximum Permissible Exposure (MPE)

#### Applicable Standard

According to subpart §1.1310, systems operating under the provisions of this section shall be operated in a manner that ensures that the public is not exposed to radio frequency energy level in excess of the Commission's guidelines.

Limits for Maximum Permissible Exposure (MPE) (§1.1310, §2.1091)

| (B) Limits for General Population/Uncontrolled Exposure |                               |                               |                                     |                          |
|---------------------------------------------------------|-------------------------------|-------------------------------|-------------------------------------|--------------------------|
| Frequency Range (MHz)                                   | Electric Field Strength (V/m) | Magnetic Field Strength (A/m) | Power Density (mW/cm <sup>2</sup> ) | Averaging Time (minutes) |
| 0.3–1.34                                                | 614                           | 1.63                          | *(100)                              | 30                       |
| 1.34–30                                                 | 824/f                         | 2.19/f                        | *(180/f <sup>2</sup> )              | 30                       |
| 30–300                                                  | 27.5                          | 0.073                         | 0.2                                 | 30                       |
| 300–1500                                                | /                             | /                             | f/1500                              | 30                       |
| 1500–100,000                                            | /                             | /                             | 1.0                                 | 30                       |

f = frequency in MHz; \* = Plane-wave equivalent power density;

According to §1.1310 and §2.1091 RF exposure is calculated.

#### Calculation formula:

Prediction of power density at the distance of the applicable MPE limit

$S = PG/4\pi R^2$  = power density (in appropriate units, e.g. mW/cm<sup>2</sup>);

P = power input to the antenna (in appropriate units, e.g., mW);

G = power gain of the antenna in the direction of interest relative to an isotropic radiator, the power gain factor, is normally numeric gain;

R = distance to the center of radiation of the antenna (appropriate units, e.g., cm);

For simultaneously transmit system, the calculated power density should comply with:

$$\sum_i \frac{S_i}{S_{Limit,i}} \leq 1$$

**Calculated Data:**

| Operation Modes                                                                                                                                    | Frequency (MHz) | Antenna Gain |           | Conducted output power including Tune-up Tolerance |           | Evaluation Distance (cm) | Power Density (mW/cm <sup>2</sup> ) | MPE Limit (mW/cm <sup>2</sup> ) |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|--------------|-----------|----------------------------------------------------|-----------|--------------------------|-------------------------------------|---------------------------------|
|                                                                                                                                                    |                 | (dBi)        | (numeric) | (dBm)                                              | (mW)      |                          |                                     |                                 |
| WiFi 2.4G                                                                                                                                          | 2412-2462       | 5.73         | 3.74      | 24                                                 | 251.18864 | 20.00                    | 0.1870                              | 1.0                             |
| WiFi 5.2G                                                                                                                                          | 5150-5250       | 4.21         | 2.64      | 13                                                 | 19.95     | 20.00                    | 0.0105                              | 1.0                             |
| WiFi 5.3G                                                                                                                                          | 5250-5350       | 4.21         | 2.64      | 12                                                 | 15.85     | 20.00                    | 0.0083                              | 1.0                             |
| WiFi 5.6G                                                                                                                                          | 5470-5725       | 6.45         | 4.42      | 12                                                 | 15.85     | 20.00                    | 0.0139                              | 1.0                             |
| WiFi 5.8G                                                                                                                                          | 5725-5850       | 5.65         | 3.67      | 13                                                 | 19.95     | 20.00                    | 0.0146                              | 1.0                             |
| Bluetooth                                                                                                                                          | 2402-2480       | 5.73         | 3.74      | 9                                                  | 7.94      | 20.00                    | 0.0059                              | 1.0                             |
| BLE                                                                                                                                                | 2402-2480       | 5.73         | 3.74      | 9                                                  | 7.94      | 20.00                    | 0.0059                              | 1.0                             |
| NFC                                                                                                                                                | 13.56           | /            | /         | -44.28                                             | 0.00004   | 20.00                    | <<0.0001                            | 0.98                            |
| NFC field strength is 50.92BμV/m @ 3m = -44.28 dBm(0.00004mW) EIRP. That equal to antenna gain is 0dBi and used the EIRP value as conducted power. |                 |              |           |                                                    |           |                          |                                     |                                 |

Note: The Conducted output power including Tune-up Tolerance provided by manufacturer

**Simultaneous transmission:**

BT, BLE, WiFi can't transmit simultaneously. WiFi/BLE/Bluetooth and NFC can transmit simultaneously:

$$S_{BLE}/S_{limit-BLE} + S_{NFC}/S_{limit-NFC}$$

$$= 0.187/1 + 0.0001/0.98$$

$$= 0.187$$

$$< 1.0$$

**Result:** The device meet FCC MPE at 20 cm distance
