

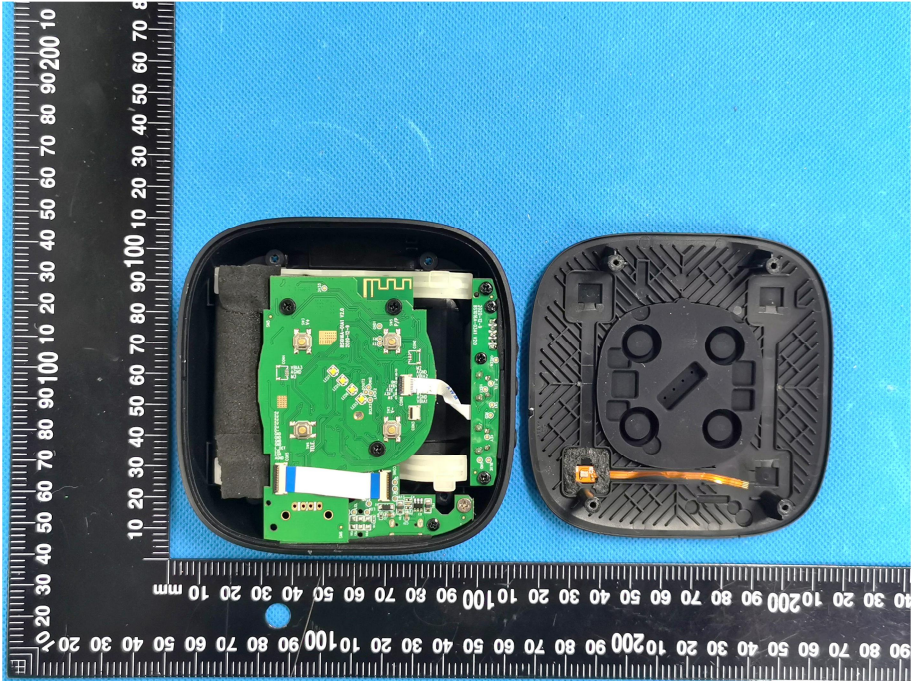

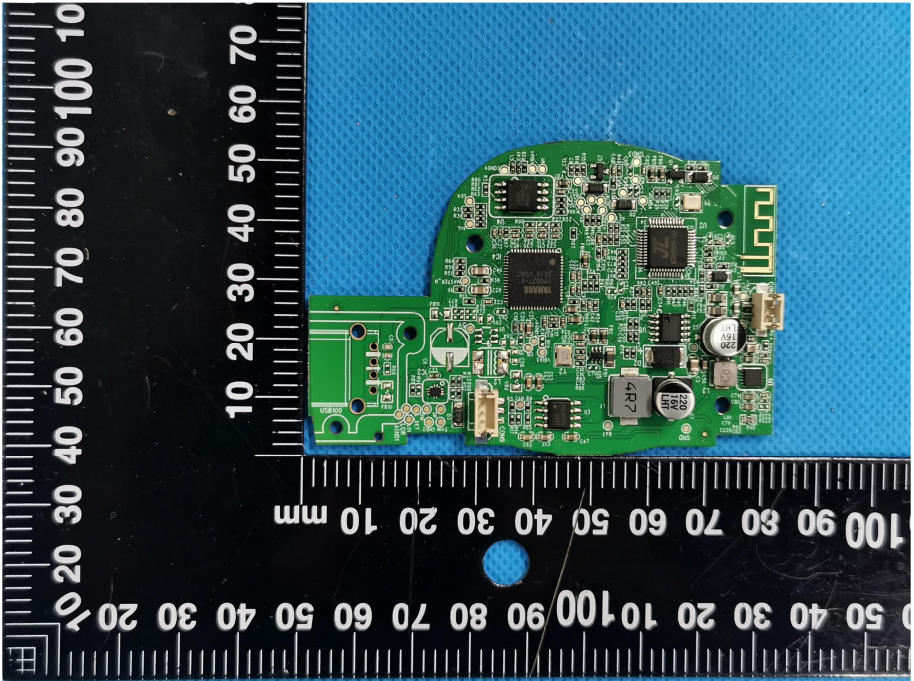

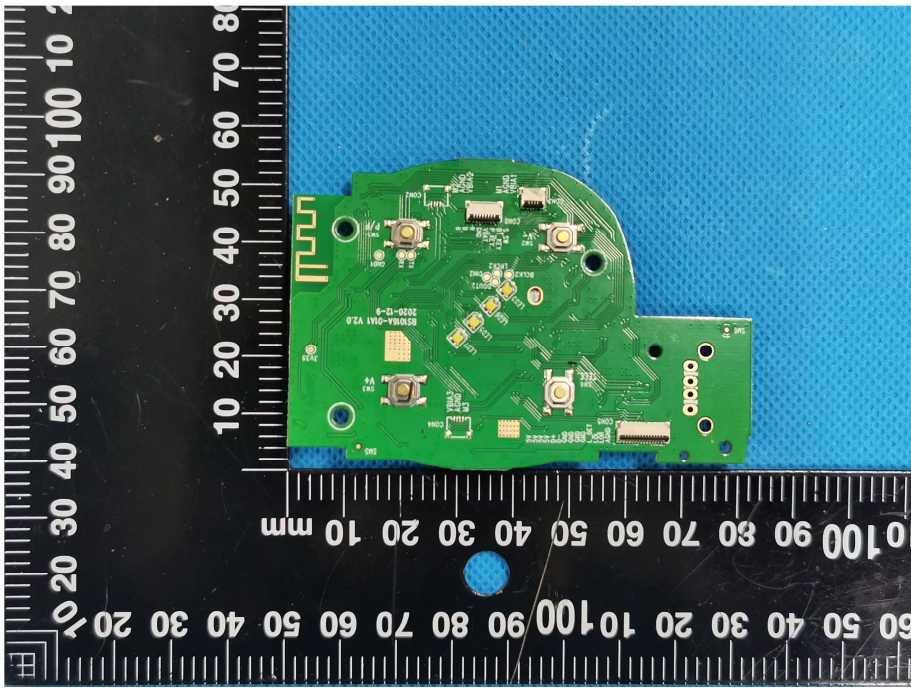

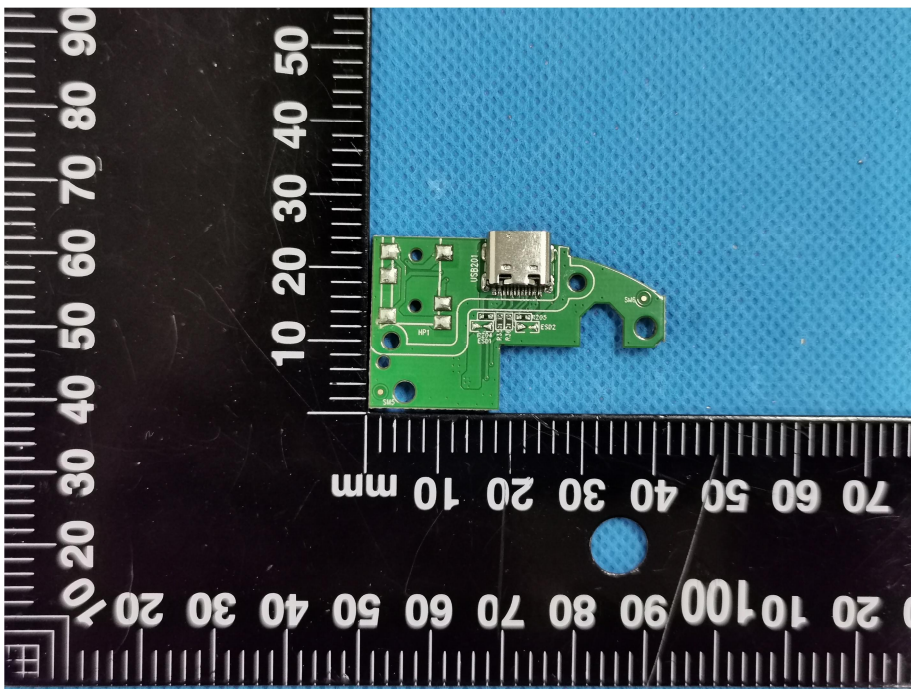

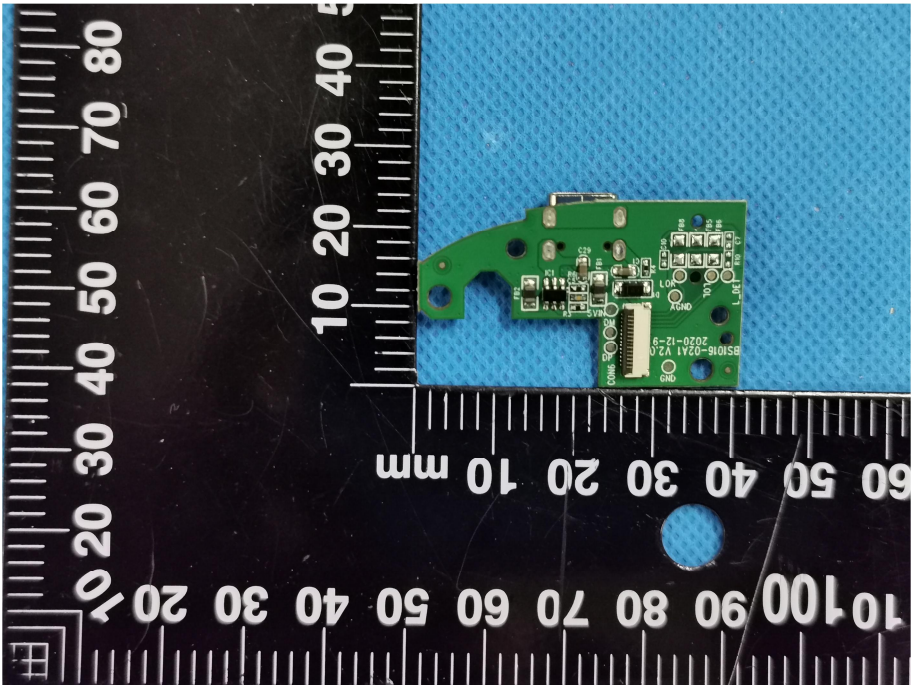

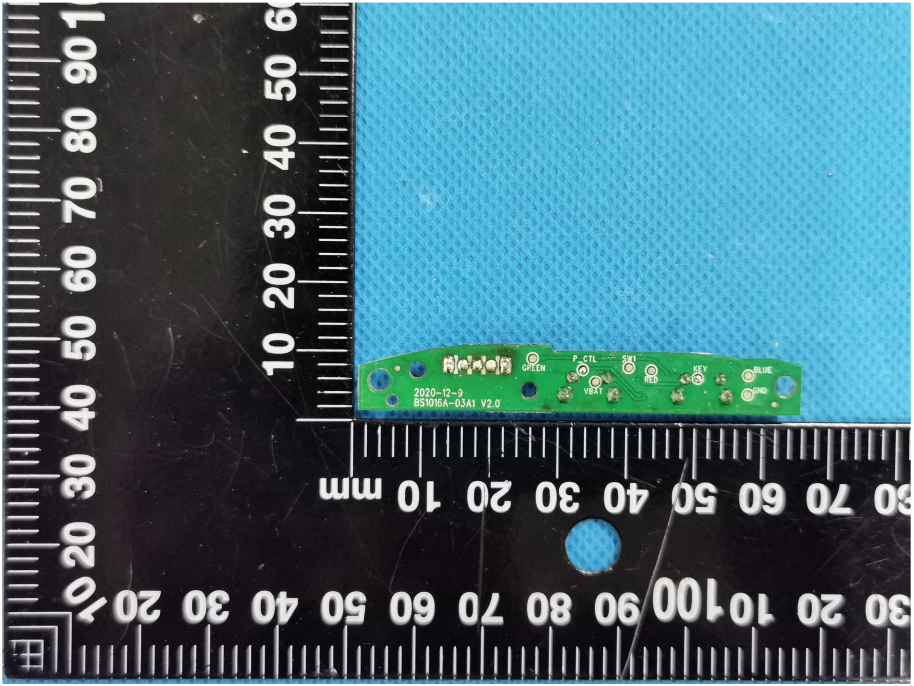

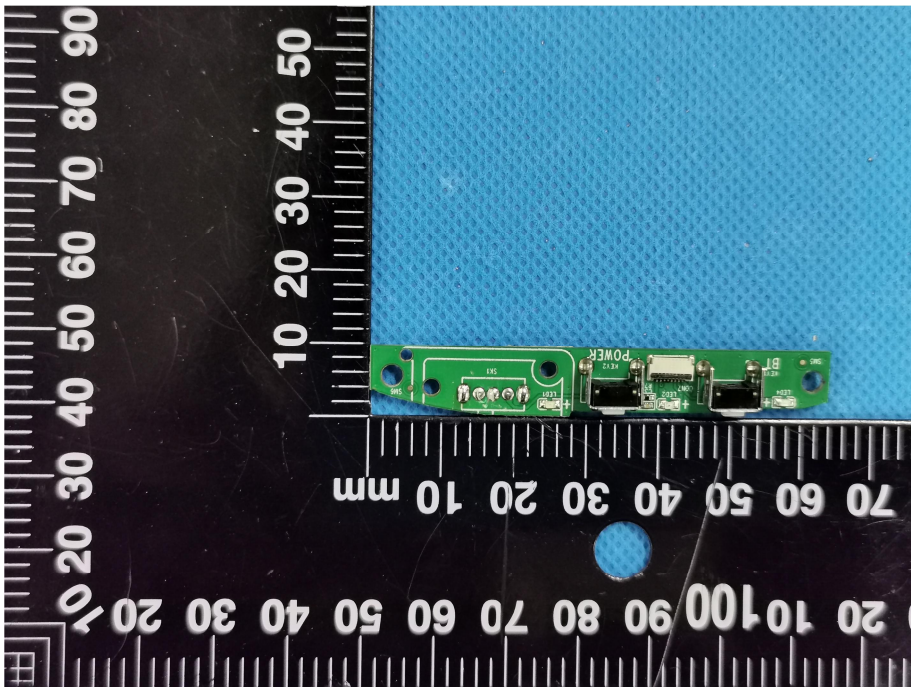

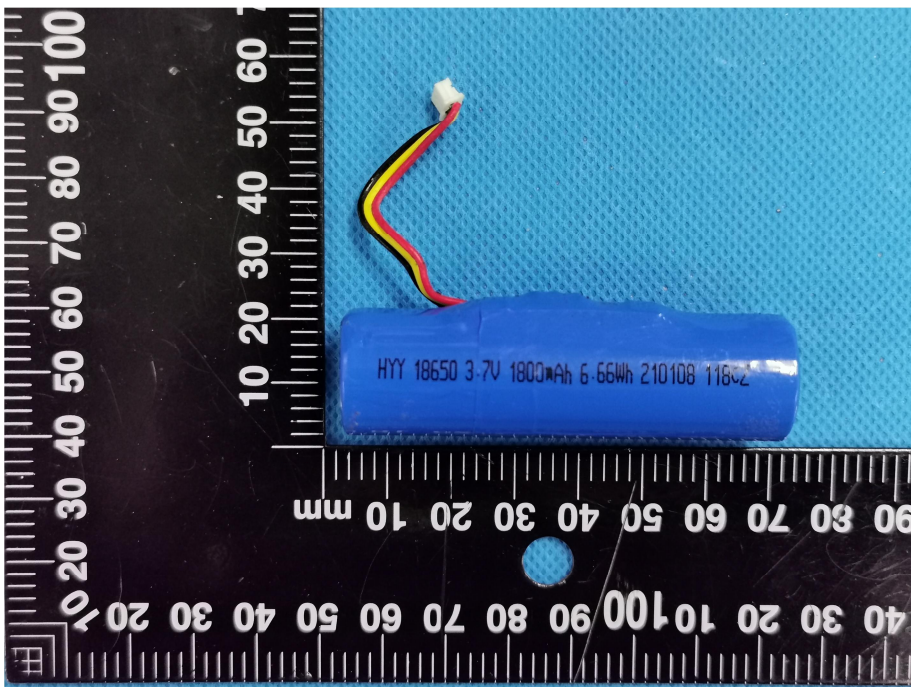

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

| | |
|---|---|
| <p>EUT Housing and Board View 1</p> |  A photograph showing the internal components of an EUT. On the left is a green printed circuit board (PCB) populated with various electronic components, including a microcontroller, capacitors, and connectors. On the right is a black plastic housing with a textured interior and several circular cutouts. Both components are placed on a blue textured surface. A black ruler with white markings is positioned vertically on the left side of the components, showing measurements in millimeters from 0 to 100. |
| <p>Solder Board-Component View 1</p> |  A close-up photograph of the green PCB from the previous view. The board is densely packed with electronic components, including a large black integrated circuit (IC), several smaller ICs, capacitors, and resistors. A gold-plated antenna connector is visible on the right edge. The board is placed on a blue textured surface. A black ruler with white markings is positioned vertically on the left side of the board, showing measurements in millimeters from 0 to 100. |

| | |
|---|---|
| <p style="text-align: center;">Solder Board-Component View 2</p> |  <p>A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 2'. The board is irregularly shaped and populated with various electronic components, including several integrated circuits (ICs), resistors, and capacitors. It is placed on a blue textured surface. A black ruler with white markings is positioned around the board to provide scale. The ruler shows measurements in millimeters, with the board's length being approximately 100 mm and its width around 40 mm.</p> |
| <p style="text-align: center;">Solder Board-Component View 3</p> |  <p>A photograph of a smaller green PCB component, labeled 'Solder Board-Component View 3'. This board is also populated with electronic components, including a prominent IC and several smaller components. It is placed on the same blue textured surface. A black ruler with white markings is positioned around the board. The ruler shows measurements in millimeters, with the board's length being approximately 50 mm and its width around 20 mm.</p> |

| | |
|---|---|
| <p style="text-align: center;">Solder Board-Component View 4</p> |  <p>A photograph of a green PCB component, labeled '4', mounted on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length spanning approximately from the 10 mm mark to the 60 mm mark. The component features various electronic components, including a microcontroller, resistors, and a connector. Text on the component includes 'BS1016-02A1 V2.0' and '2020-12-9'.</p> |
| <p style="text-align: center;">Solder Board-Component View 5</p> |  <p>A photograph of a green PCB component, labeled '5', mounted on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length spanning approximately from the 10 mm mark to the 60 mm mark. The component features various electronic components, including a microcontroller, resistors, and a connector. Text on the component includes '2020-12-9', 'BS1016A-03A1 V2.0', and 'GREEN'.</p> |

| | |
|---|--|
| <p style="text-align: center;">Solder Board-Component View 6</p> |  <p>A photograph of a green printed circuit board (PCB) component, likely a battery management system (BMS) board, placed on a blue textured surface. The board is oriented horizontally and features several components, including a central integrated circuit (IC) labeled 'POWER' and 'BT'. The board is positioned next to a black ruler with white markings, showing a length of approximately 100 mm. The ruler is placed vertically to the left of the board, with the 0 mm mark at the top and the 100 mm mark at the bottom.</p> |
| <p style="text-align: center;">Solder Board-Component View 7</p> |  <p>A photograph of a blue cylindrical battery component, likely a Li-ion battery, placed on a blue textured surface. The battery is oriented horizontally and has a white connector with three colored wires (red, yellow, and black) attached to its top. The battery is positioned next to a black ruler with white markings, showing a length of approximately 100 mm. The ruler is placed vertically to the left of the battery, with the 0 mm mark at the top and the 100 mm mark at the bottom. The text 'HYY 18650 3.7V 1800mAh 6.66Wh 210108 11802' is visible on the side of the battery.</p> |
