Annex A

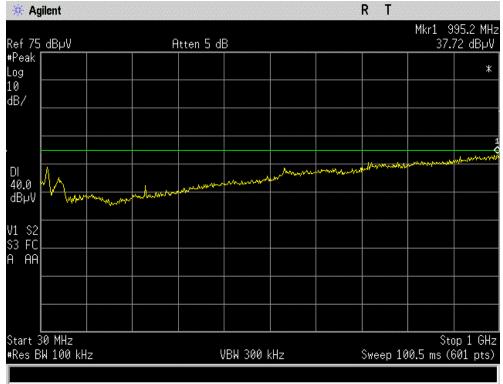

Spurious Emissions 30MHz-100 GHz And Band Edge Measurements

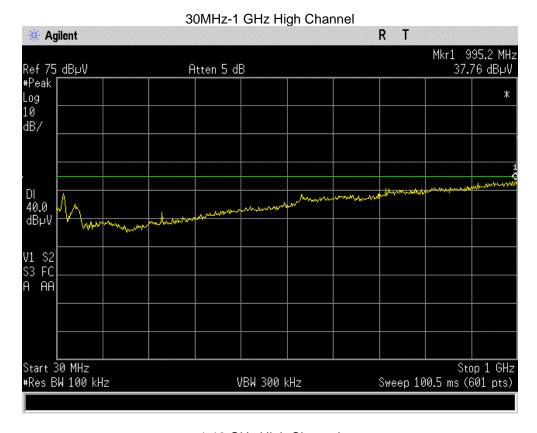

Spurious Emissions 30MHz-100 GHz

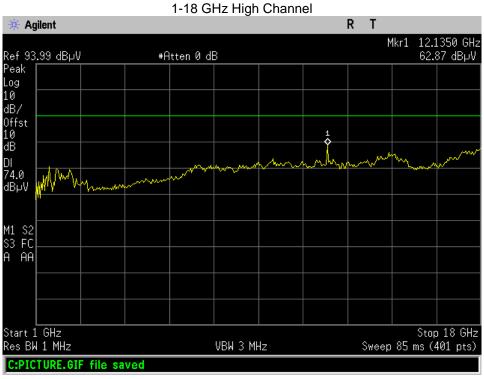

30MHz-1 GHz Low Channel

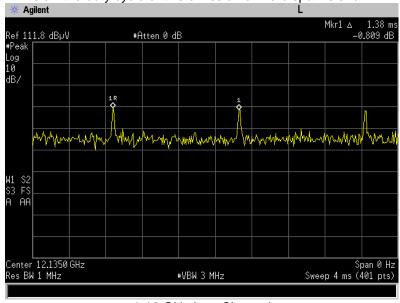

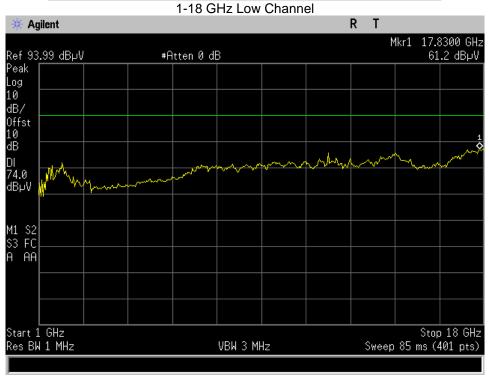

Note: This Emission is located in 15.205 restricted band of operation and it has to meet both Peak and average limits of 15.209 rule part.

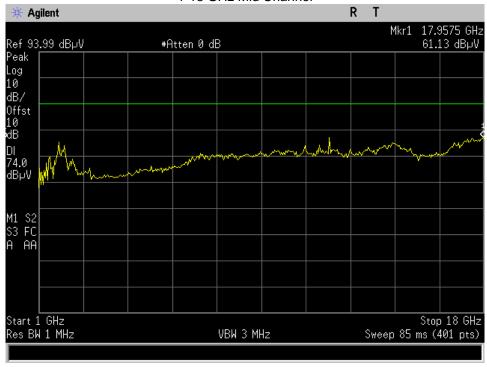

This emission has the same characteristic of the fundamental carrier while the device is sweeping. Therefor the Average is calculated the same way as of the fundamental and is included in the report on page 16.

Below the duty cycle of this emission on zero span is shown.

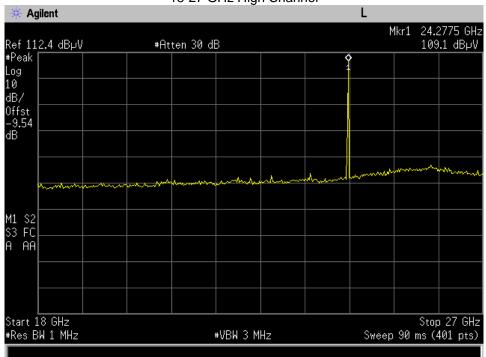

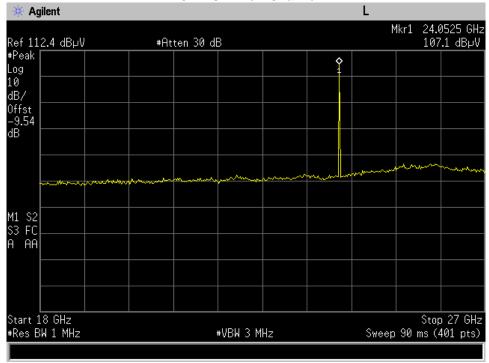

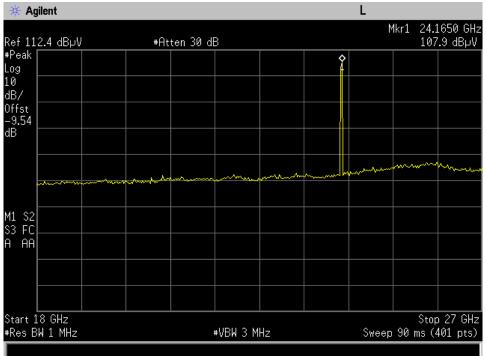

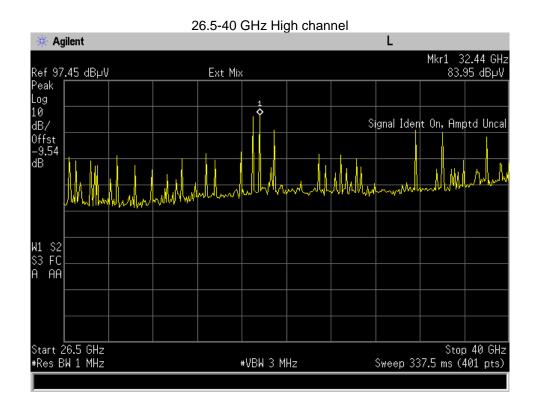

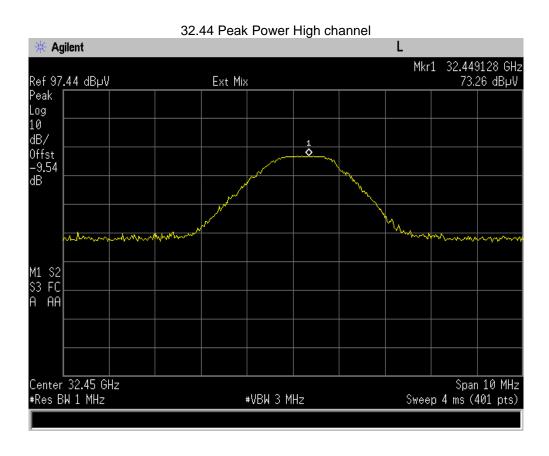

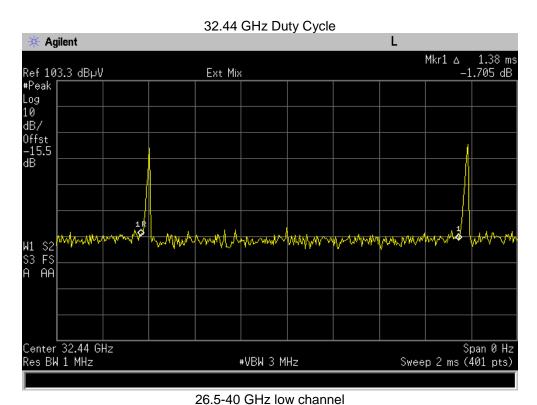

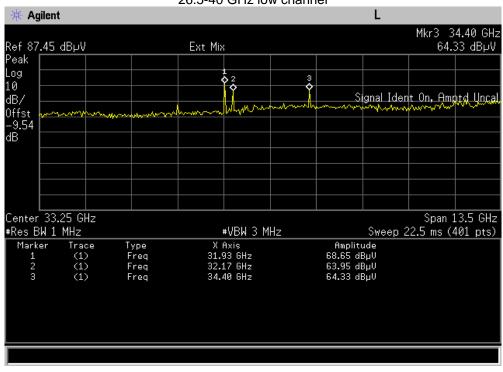

18-27 GHz Mid Channel

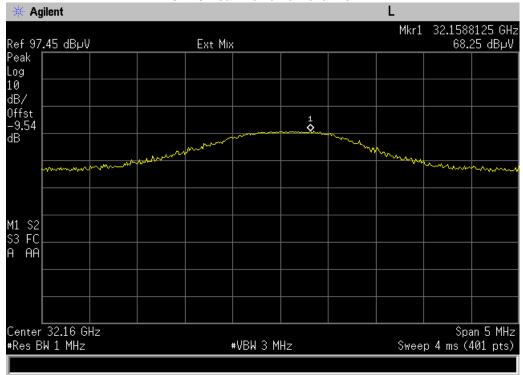

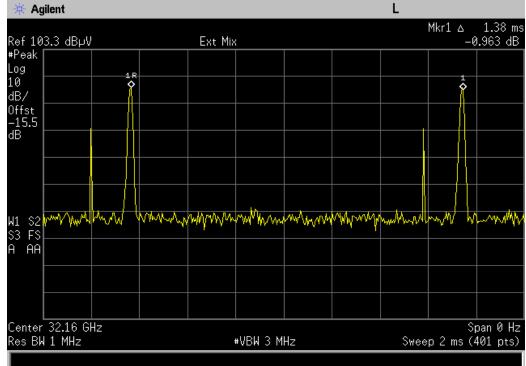

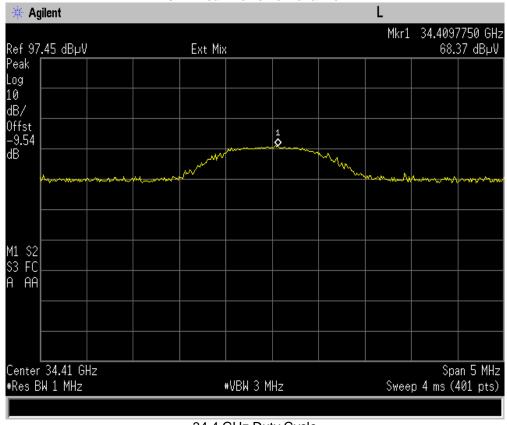

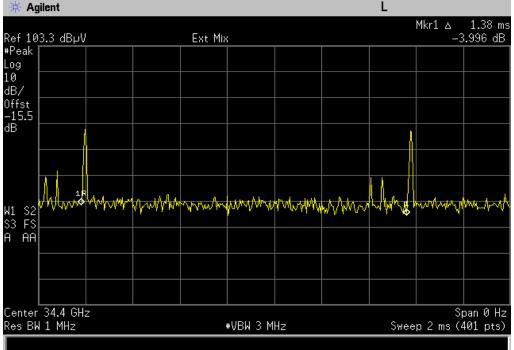

32.16 GHz Duty Cycle

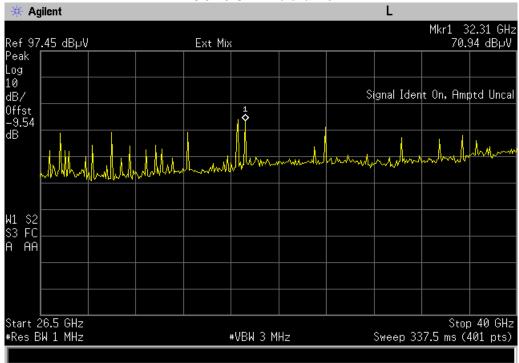

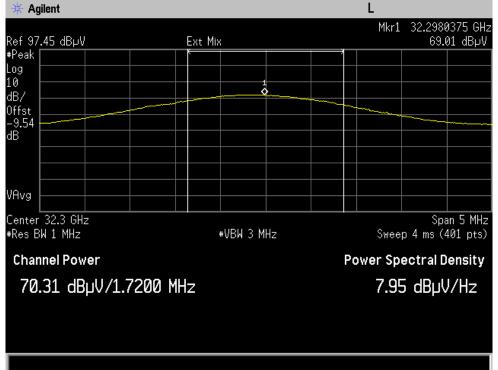

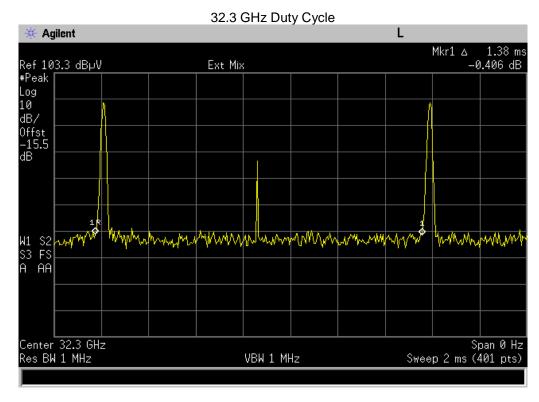

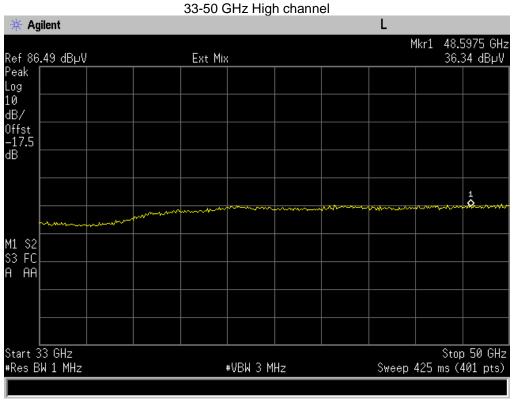

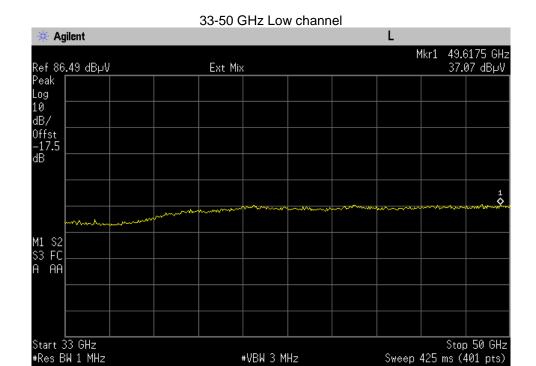

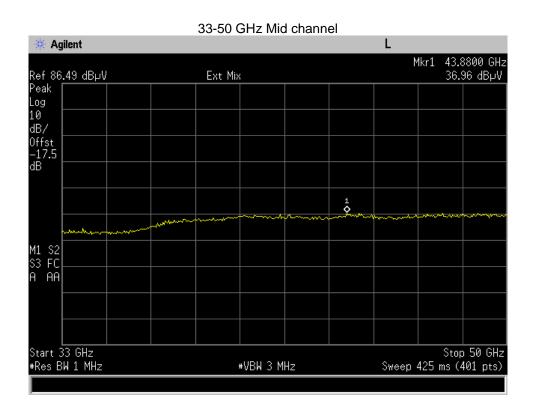

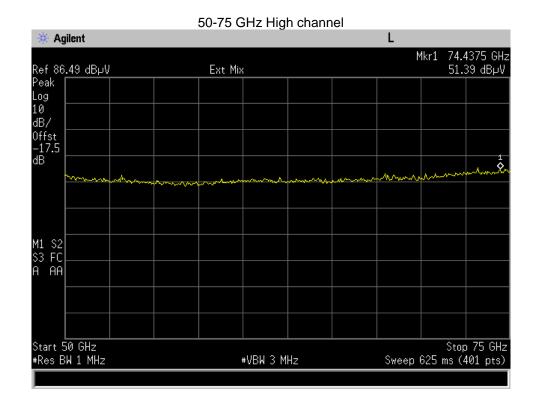

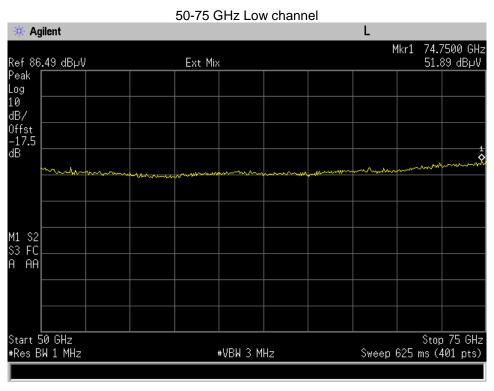

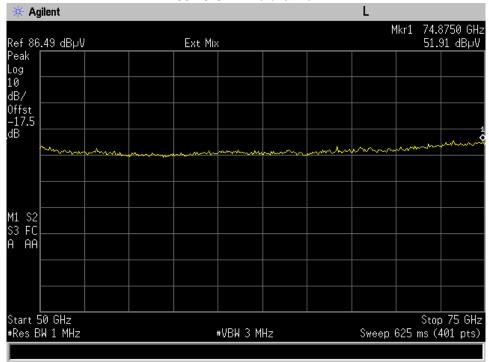

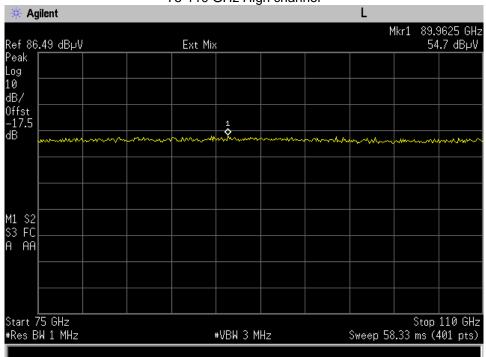

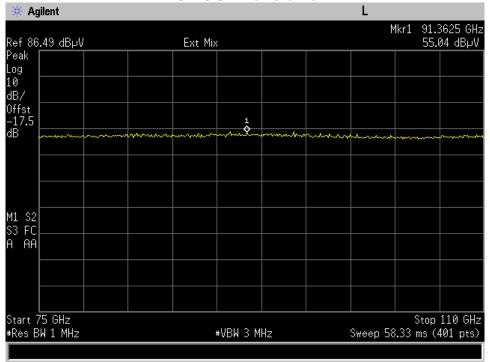

50-75 GHz Mid channel

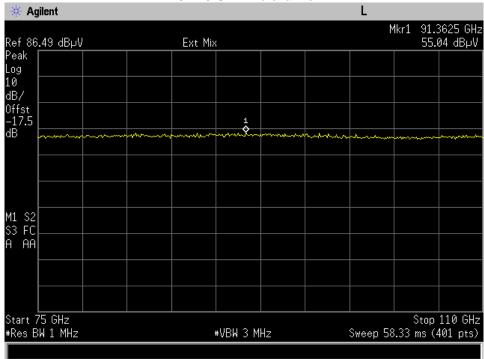

Band Edge Measurements
