### GPS AND SR

The GPS can synchronize the driving trajectory and various GPS-related parameters on the DDPAI APP of a mobile phone, including GPS positioning and GPS track recording.

The SR can import the GPS data and sensor data into the video to generate an exclusive, cool trajectory interface, giving you a better visual and content sharing experience.

NOTE: The GPS version of the Dash Cam supports GPS and SR. The normal version of the Dash Cam doesn't support GPS and SR.
