Request for Long Term Confidentiality Exceptional Circumstances  
For FCC ID: 2AJN8-GS1

To whom it may concern:

Pursuant to Sections 0.457 and 0.459 of the commission's rules, we hereby request that the Exhibits/Items listed below be withheld from public inspection and accorded long-term confidentiality:

- Internal photos

The transmitter is a Base Station where access is controlled and only available to trained personnel. We request that the internal photos be kept confidential long-term under the FCC guidelines that this is a non-consumer device (Base Station) and is inaccessible to the general public due to the location of the device. The device is only serviceable by employees of the wireless operator or their designated technicians, with all service personnel subject to non-disclosure agreements.

Harris Corporation has spent substantial effort in developing this product and it is one of the first of its kind in the industry. Having the internal architecture easily available to competitors would negate the advantage Harris has achieved by developing this product.

Amanda Disney, Program Manager,  
Harris Corporation, Critical Networks
