

BLUE-2717C

The color of screen printing is not white
White is just to facilitate the display of the
content to be printed. The actual screen
color should be consistent with the shell
material #2717C or the screen color is
slightly lighter or darker than the shell
material

The color number of screen printing is adjusted by itself

PINK-236C

The color of screen printing is not white
White is just for the convenience of showing
what is to be printed
The actual screen color should be consistent
with the shell material #236C or the screen
color is slightly lighter or darker than the shell
material
