

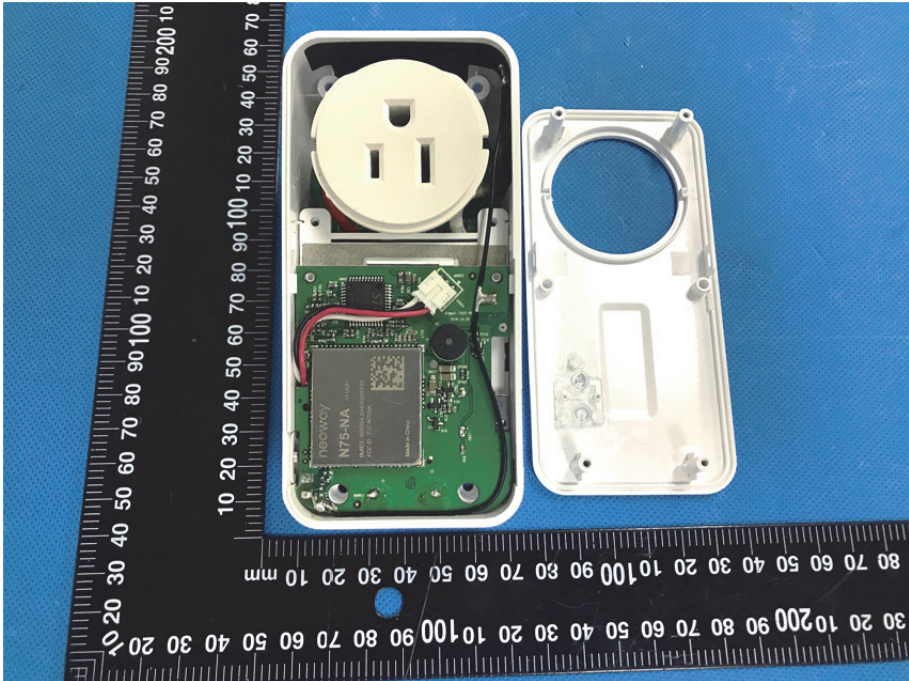

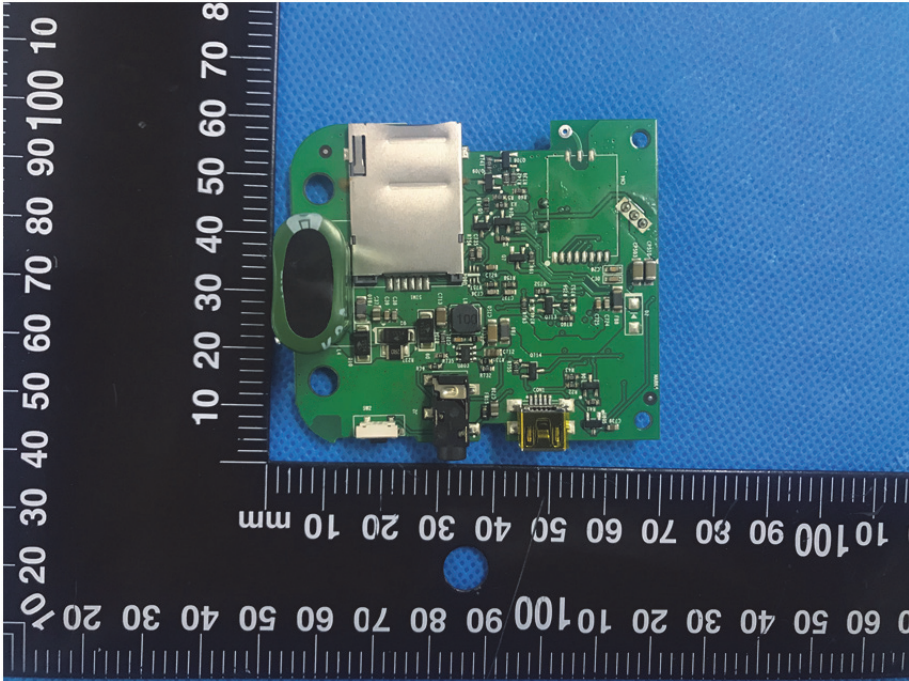

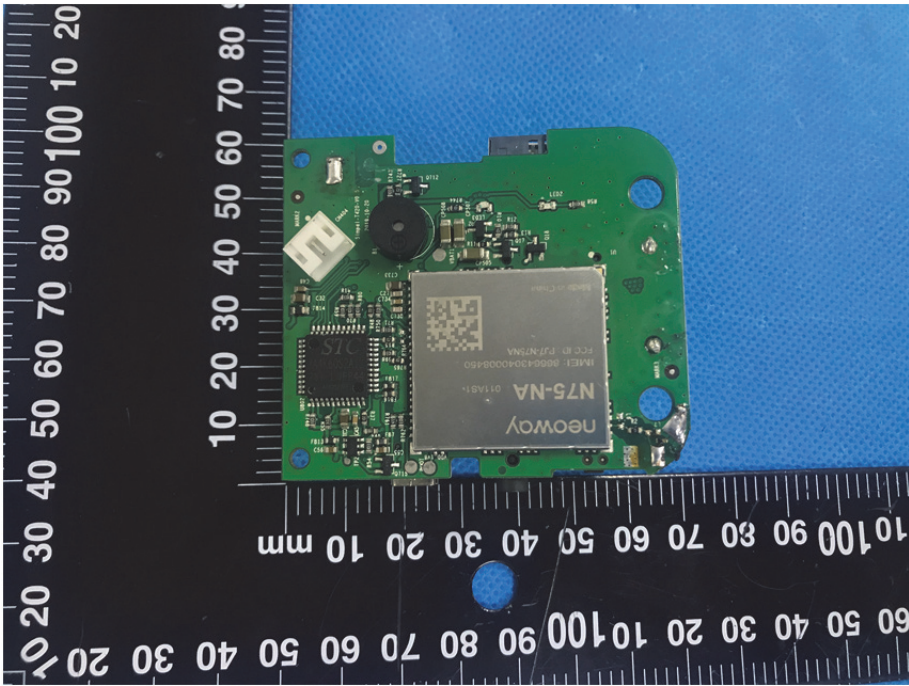

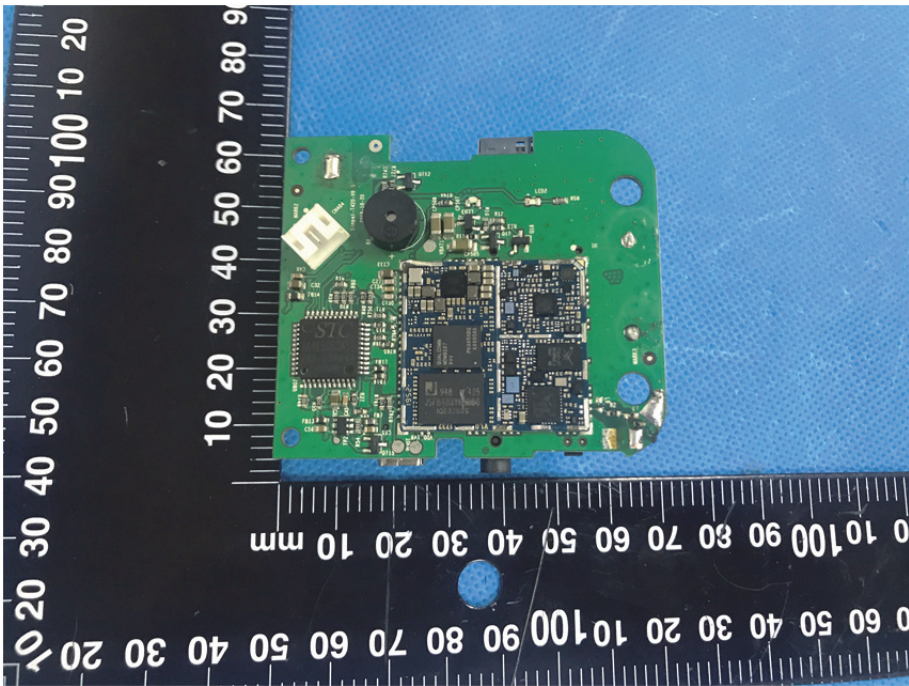

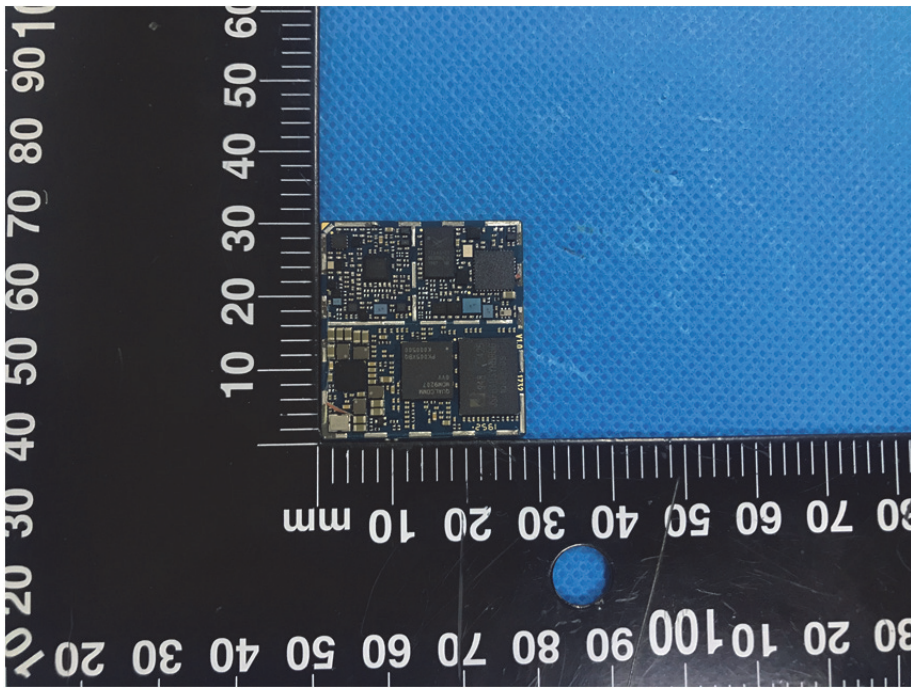

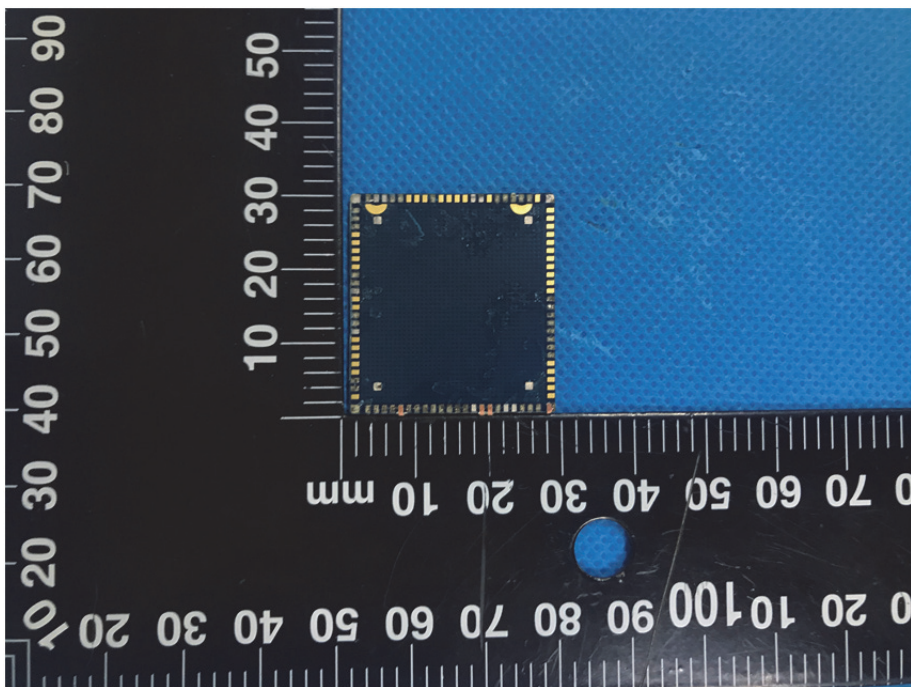

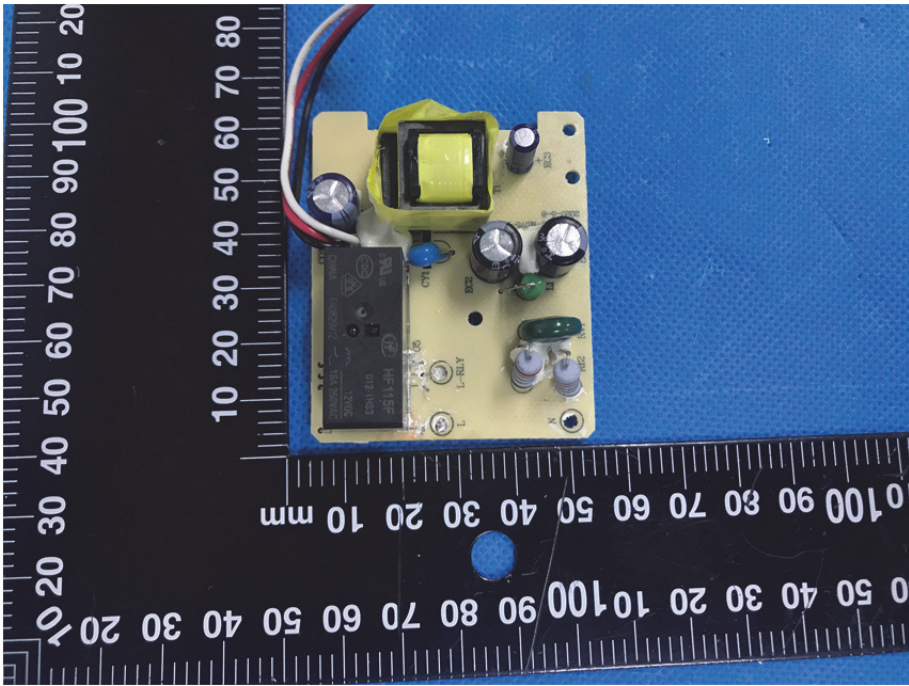

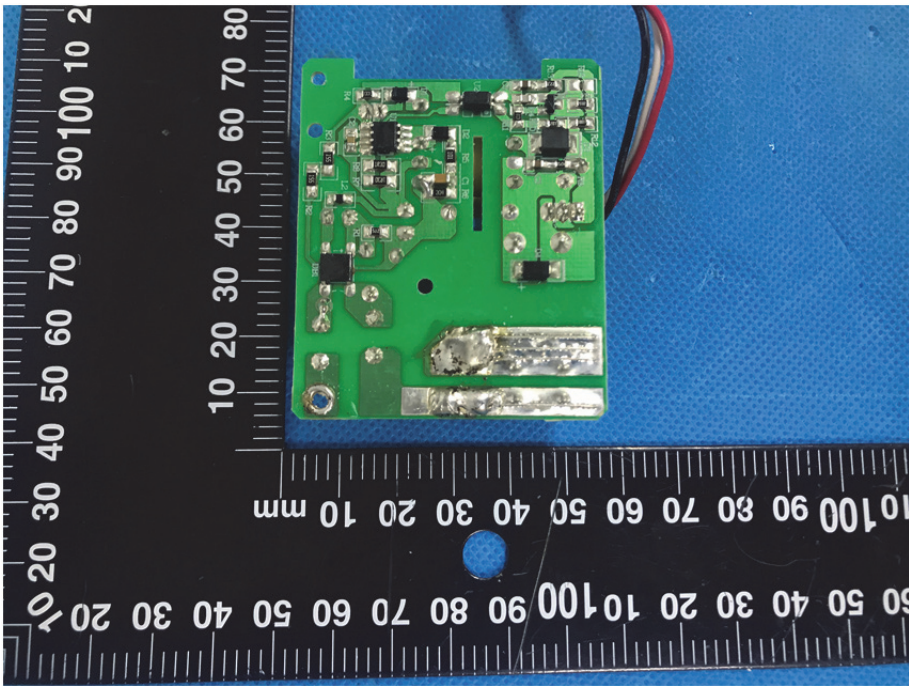

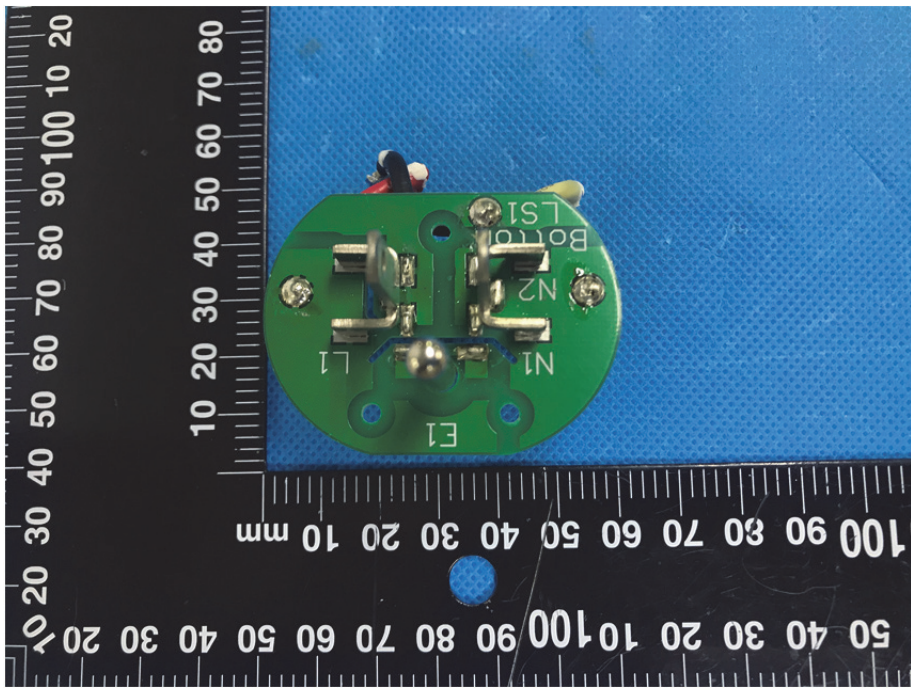

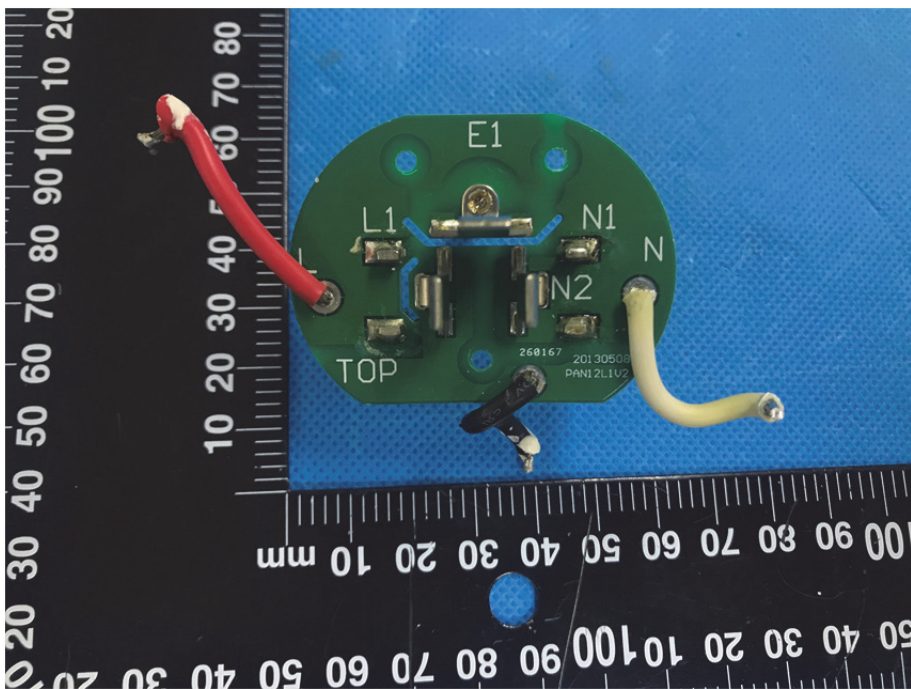

### EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p><b>EUT Housing and Board View 1</b></p>	 <p>A photograph showing the internal components of an EUT. On the left, a white plastic housing is partially assembled around a green printed circuit board (PCB). A white circular component is mounted on top of the PCB. To the right, the white plastic housing is shown separately, revealing a circular opening. A black ruler with white markings is placed vertically and horizontally to provide scale. The ruler markings are in millimeters, with major ticks every 10 mm and minor ticks every 1 mm. The background is a blue textured surface.</p>
<p><b>Solder Board-Component View 1</b></p>	 <p>A close-up photograph of the green PCB. The board is populated with various electronic components, including a large silver component, several integrated circuits, and surface-mount components. A black ruler with white markings is placed vertically and horizontally to provide scale. The ruler markings are in millimeters, with major ticks every 10 mm and minor ticks every 1 mm. The background is a blue textured surface.</p>

<p style="text-align: center;"><b>Solder Board-Component View 2</b></p>	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 2'. The board is rectangular with rounded corners and features a prominent square component in the center. This component is a Neoway N75-NA, with a QR code and the text 'N75-NA', 'neoway', 'IMEI: 86864304000840', and 'F.C.C. ID: F7F-N75NA' visible on its surface. The board also has a white connector on the left side, a black circular component, and various other electronic components. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters, showing the board's dimensions.
<p style="text-align: center;"><b>Solder Board-Component View 3</b></p>	 A photograph of the same green PCB component, labeled 'Solder Board-Component View 3'. This view shows the reverse side of the board, revealing a dense array of electronic components, including several integrated circuits and surface-mount components. The board is placed on the same blue textured surface next to the same black ruler with white markings in millimeters, providing a clear view of the component layout from the opposite side.

<p><b>Solder</b> <b>Board-Component View</b> 4</p>	 <p>A microscopic view of a small, square, dark-colored component soldered onto a blue textured substrate. The component is positioned on a black ruler with white markings. The ruler shows measurements in millimeters, with the component's width spanning approximately from the 10 mm mark to the 30 mm mark. The component itself has a complex surface with various small features and markings.</p>
<p><b>Solder</b> <b>Board-Component View</b> 5</p>	 <p>A microscopic view of a square component with a gold-colored border, soldered onto a blue textured substrate. The component is positioned on a black ruler with white markings. The ruler shows measurements in millimeters, with the component's width spanning approximately from the 10 mm mark to the 30 mm mark. The component has a distinct gold-colored border and a dark center.</p>

<p style="text-align: center;"><b>Solder Board-Component View 6</b></p>	 A photograph of a yellow PCB component assembly. The board is populated with a transformer, several electrolytic capacitors, and other electronic components. It is placed on a blue surface next to a black ruler with white markings for scale. The ruler shows measurements in millimeters, with the component spanning approximately 100mm in length and 80mm in width.
<p style="text-align: center;"><b>Solder Board-Component View 7</b></p>	 A photograph of a green PCB component assembly. The board is densely packed with various electronic components, including integrated circuits, capacitors, and resistors. It is placed on a blue surface next to a black ruler with white markings for scale. The ruler shows measurements in millimeters, with the component spanning approximately 100mm in length and 80mm in width.

<p style="text-align: center;"><b>Solder Board-Component View 8</b></p>	 <p>A photograph of a circular green PCB component, labeled 'Solder Board-Component View 8'. The component is shown from the bottom side, with labels 'E1', 'L1', 'N1', 'N2', and 'LST1' visible. It is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.</p>
<p style="text-align: center;"><b>Solder Board-Component View 9</b></p>	 <p>A photograph of the same circular green PCB component, labeled 'Solder Board-Component View 9'. This view shows the top side of the component, with labels 'E1', 'L1', 'N1', 'N2', and 'TOP' visible. A red wire is connected to the L1 terminal, and a yellow wire is connected to the N terminal. The component is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.</p>

**Antenna View**
