Preparations

Connecting to PC

Boot the PC, and connect the device to the PC via the special USB cable, then you can transmit data between the PC and your tablet. Mounting as USB mass storage, then you can copy or delete files on your device with your PC.

Notice: While the device is mounted as mass storage, you cannot play the media files in it. CUBE will not be held responsible for damages resulted from this kind of false operations.

Booting

In shutdown state, long press the power button for 3 seconds and the system will go into the Android progress bar. Approximately 40 seconds later the system will go into the lockscreen. slide upward from the bottom of the screen would be unlocked the screen.

Battery Saving Mode & Screen Lock: When the tablet goes into battery saving mode, the display will black out and the OS will go to the lockscreen. Press the power button again and the screen will be awakened in one second.

Notice: battery saving mode will only put off the display, running applications such as music player will continue to work.

Notice: if the tablet cracks down, you could long press power button to force a reboot.

Shutting down

While the tablet is on, long press the power button for 3 seconds, a shutdown confirmation window will pop up. Choose to "shutdown" and the tablet will be turned off.

Notice: if the battery is too low, the tablet will fire up alarms from time to time. If you don't charge it immediately, it will automatically be turned off while the battery is used up. If you cannot boot the phone after you connect it to the charging cable, please wait for 5-10 minutes before you try again.

Power Management and Charging

1. You should charge the battery for 8 hours the first time to fully activate it.

2. Plug the charger into the socket, connect the charger and the tablet with the bundled USB cable. If the battery icon in the status bar is like this 🔋, then the charging is going on, please do not disconnect the charging cable until the tablet is fully charged. If the battery icon becomes static 🔋, then the battery is fully charged.

Notice:
1. The bundled charger (5V-2A) can be purchased from the local distributor.

2. Please charge the device with the screen turned off. If it is charged with the screen on, there is a chance that the battery won't be fully charged.

3. Please do not charge the tablet with a charger of 6V or 9V output, CUBE will not be held responsible for damages resulted from false charging.

Instructions

Wi-Fi Settings:

1. Turning on: Open the app drawer and find the Setting icon ⚙, touch to open the setting menu, slide the Wi-Fi switcher to turn on Wi-Fi.

2. Choose the available wifi access , for example, the "CUBE_4", then it will require you to put in the password, click "connect". Once you put in the correct password, the system will help you obtain the IP address. Once it is successfully connected, you will see a connected icon in the status bar.

Bluetooth

Name of the device: The screen will display the names of the other Bluetooth devices, which are normally the models of the devices, and you can rename them according to your individual needs. Once you found the other Bluetooth devices, you can touch to pair it with your device. Once the pairing request is granted by the owner of the other device, you will be able to send files to or receive files from the paired device without consuming your mobile network flow.

OTA update

CUBE will push notifications to your tablet if any updated firmwares are available. You can use OTA to update your device. Also you can check the available updated firmware by :: Setting- About the tablet.

Please use Official OS to make a backup of system update.If not,may cause security risk.

Display screen	×	○	○	○	○	○
Plastic	○	○	○	○	○	○
Metal	○	○	○	○	○	○
Battery	×	○	○	○	○	○
Accessory	×	○	○	○	○	○

○ : Indicates that this hazardous substance contained in all homogenous materials of this part is below the limit requirements GB/T 26572-2011

× : Indicates that this hazardous substance contained in at least one of the homogenous materials of this part is above the limit requirement in GB/T 26572-2011

Remarks:The reason of indicating " × " is none of substitute technology or parts.

Use period is valid only when the product is operated under the condition defined in the product manual.

FCC Warnning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.

2. Increase the separation between the equipment and receiver.

3. Connect the equipment into an outlet on a circuit

---

different from that to which the receiver is connected.

4. Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Specific Absorption Rate (SAR) information:

This Tablet PC meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health. FCC RF Exposure Information and Statement the SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: Tablet PC (FCC ID: 2AKO6-U83) has also been tested against this SAR limit. This device was tested for typical body-worn operations with the back of the Tablet PC kept 0mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 0mm separation distance between the user's body and the back of the Tablet PC. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
