Select the mode and call up the option menu:

**Activate:** You can activate the selected.

**Add:** You can add setting options to the selected

**Settings:** Adjust ringer, keypad sounds, other desired sounds

## SOS

The SOS function is a simple feature that can save lives in the decisive moment. You can store a total of 6 SOS contacts and SMS. You must save these contacts first, in case of an emergency when you press the emergency call key on the back of the phone, these numbers will be called in sequence.

During the emergency call a warning signal will be issued, so the person knows that it is an emergency and it sends an emergency SMS to all stored numbers! If the first number is not reached, the next number is dialed automatically, etc.

If no emergency number is stored or your phone card is empty or you are in a foreign network (E.g. roaming not enabled), you can still Select 911 or other emergency numbers with the digit keys.

Will be accepted the SOS call switches the hands-free telephone.

**When using a pre-paid SIM card:**

Make sure you always have sufficient credit on your pre-paid SIM card as private emergency numbers without sufficient balances are not elected.

- Usually the international emergency call 911 can still be called outside of the network provider's home network.

Note: If you want to store emergency numbers such as rescue, police, fire service etc. as emergency number, you would need to check before this with the respective institution. Assumes no liability for any costs incurred, if you mistakenly call.

## **SOS Settings:**

### **SOS Function on/off:**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two

conditions: (1) this device may not cause harmful interference, and (2) this device must accept any

interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could

void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital

device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable

protection against harmful interference in a residential installation. This equipment generates, uses

instructions, may cause harmful interference to radio communications. However, there is no

guarantee that interference will not occur in a particular installation. If this equipment does cause

harmful interference to radio or television reception, which can be determined by turning the

equipment off and on, the user is encouraged to try to correct the interference by one or more of

the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
