

CONNECTING THE DEVICE

Connection Instructions:

Connect HDMI input with HDMI source device and connect the IR blaster extension cable with the IR OUT interface of the transmitter (TX). Connect HDMI output with HDMI display device and connect IR receiver extension cable with IR IN interface. Turn on the device.

NOTE: When the wireless signal transmits through wall, glass, or other obstacles, it will cause signal loss. For best results, install the device in an environment with few obstructions.

Wireless signals from other devices such as a microwave, wireless mouse, or keyboard may interfere with the transmission.

Troubleshooting:

TV displays "waiting for connection" on the bottom right corner.

- Please check if the power supply of the transmitter (TX) and receiver (RX) are well connected and the power indicator LED lights are on.

TV displays "please check the TX input signal."

- 1) Please check if there is an HDMI signal input of transmitter (TX).
2) Try to connect the signal source directly to the display device to see if there is signal output from the source device. If this does not work, change the signal source and HDMI cables and try again.

Transmission is not stable.

- 1) Move the position of the sender (TX) and receiver (RX) and make sure the device is within the required signal range.
2) Press "reset" button on the TX/RX panel and reconnect.
3) Remove any sources of wireless signal disturbance and reduce obstructions between devices.

SPECIFICATIONS

HDMI Signal	Fully compatible with HDCP
Transport Protocol	HDbitT
Supported Resolution	480i@60Hz, 480p@60Hz, 576i@50Hz, 576p@50Hz, 720p@50/60Hz, 1080i@50/60Hz, 1080p@50/60Hz, 4K x 2K@30Hz/24Hz/25Hz
IR Remote Control	Supports 20~60kHz wide frequency IR remote device
Transmission Distance	200m at 4K x 2K@30Hz
Working Temperature	0°C~60°C
Power Supply	DC5V/3.5A *2PCS
Power Consumption	TX: ≤15W; RX: ≤15W
Material	Metal
Dimensions	195(L) x 137(W) x 32(H)mm *2PCS
Weight	TX: 560g RX: 560g

USER MANUAL

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

To comply with FCC RF exposure compliance requirements, this grant is applicable to only mobile configurations. The antennas used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.
