Subject: Letter of Changes – from original Grantee FCC number N7NHL7618RD

Dear regulatory authority,

This letter is meant to inform the level of change that is going to be made to the original grantee FCC number from Sierra Wireless N7NHL7618RD.

- The intended change involves RF antenna collocation with a 2.4GHz WiFi/BLE combination module which already FCC certified under Redpine FCC number XF6-RS9113SB
- The combination of these two devices will need to be tested for collocation performance for non-interfering validation

No other changes to the antenna certifications, RF TX power, or RF modulations will be changed in this scope.

Sincerely,

A handwritten signature in black ink, appearing to read "Mike Drake".

Mike Drake
Director of Engineering
