ILIFE

How to Use

> Pause

While the robot is working, press ▶❙❙ on the robot or remote control to pause the cleaning cycle.
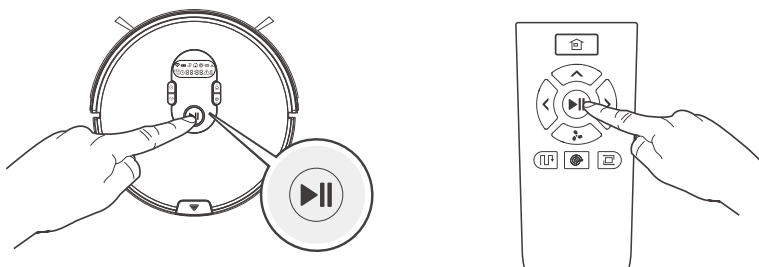

* Robot will plan a new route after it is paused and restarted. It will repeat cleaning the areas it has covered.
* Move the robot's position with the remote control when it is paused.
* Robot will enter sleep mode after idling for 10 minutes, and the light on the right turned off. To reactivate it, press ▶❙❙ , ⊓⊓ or ▶❙❙ on the remote control. To start cleaning, pressany button.

> Switching off the robot

Turn the power switch to "O" after the robot is paused.
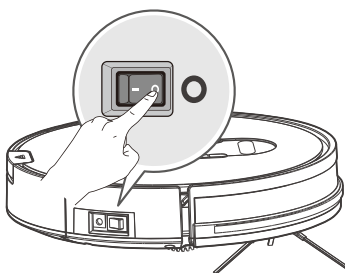

* To get your robot ready to work anytime, always keep it fully charged by keeping the power switch on after each use.

ILIFE

How to Use

Cleaning modes and functions

The robot comes with several cleaning modes to achieve optimal cleaning performace and better user experience. To select cleaning modes, use the control panel on the robot, remote control or APP.

* When the robot is switched from AUTO mode to another, and returns to AUTO mode after the specific tasks are completed, it will reset a new route and repeat the route that has been covered.
Before setting a cleaning mode, make sure the robot is reactivated (the light at ▶❙❙ is on). To reactivate the robot, press ▶❙❙ , ⊓⊔ or ▶❙❙ on the remote control.

> AUTO mode

When the robot finishes cleaning an area in AUTO mode, it will move along the walls to the next area. AUTO mode is suitable for carpet cleaning.

Note: Presson ▶❙❙ the robot or remote control to start AUTO mode.
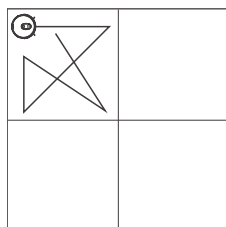

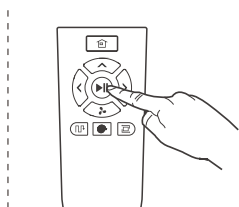

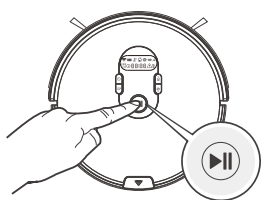

> Path mode

To start Path mode, press ⊓⊔ button on the robot or ⊓⊔ button on the remote control. The robot will take a M-shaped cleaning route, and approach and clean the areas it has missed during a cleaning cycle.

ILIFE
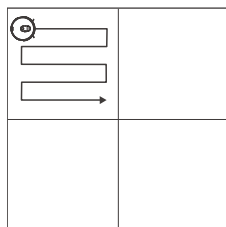

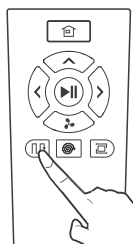

How to Use

> Point mode

For specific areas that require deep cleaning. Press ⊚ button on the robot or ⊚ button on the remote control to start Point mode.
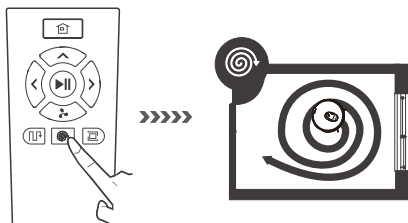

> MAX mode

For areas with concentrated dust and dirt. For increased suction power and deep cleaning, press ⟨⟩ button on the robot when it is in AUTO mode. The display will show HI, denoting high suction power. To return to normal suction, press ⟨⟩ button again. The display will show LO, denoting low suction power.
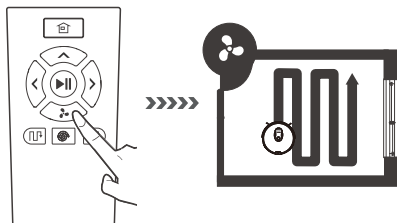

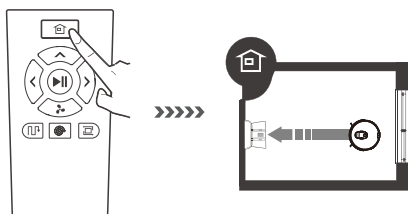

> Broder mode

For the edges and corners of the walls. The robot will clean along the barriers (eg. walls) and return to the charging base after the task is finished.
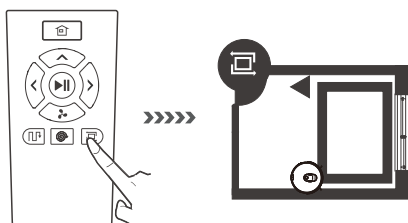

> Self-charging

When the battery runs low, the robot automatically pauses the cleaning cycle and returns to charging base for recharge.

To return the robot to the charging base for recharge, press ⌂ button.

How to Use

Setting a schedule

Set a cleaning schedule for the robot and it will automatically clean your home at a specific time. Before setting a schedule with the APP or control panel on the robot, adjust local time on the robot control panel.
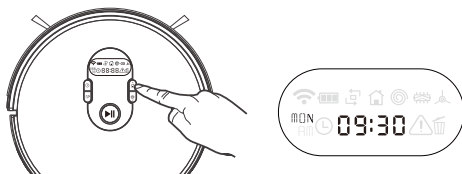

> Setting local time

To recover the robot from sleep mode, press and hold ⊙ button. Set the clock after a beep and when the first two digits on the display flash.
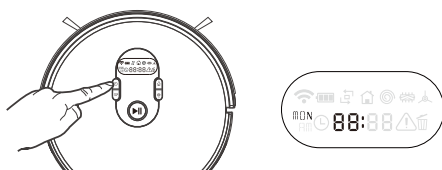

Use ⌂ button and ⊚ button to adjust the numbers. To adjust local time, use ⊙ button to adjust hour, minute, 12/24 hour format and week.
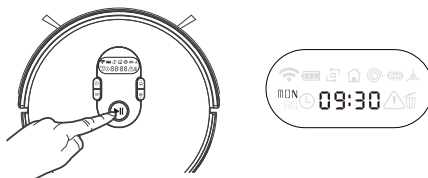

> * To adjust the 12/24 hour format, press ⎁ . The display will show "ON/OFF".

Press ▶❙❙ to save the setting.

> * The robot will exit the setting after idling for 15 seconds. The setting will not be saved.
> Press ▶❙❙ to confirm and save the setting.

ILIFE

How to Use

> Setting a schedule
Method 1:
