FCC ID:2APUF-W6  
W6 • Wireless Charger

Thanks for choosing us ! W6 is a Qi standard, ultra-thin wireless charger, utilizing the design of quality transmission coil, which brings higher efficiency and more stable performance. With the W6, no more tangled cables and just put your phone to start a charge. The amazing user experience will make you love it.

Product components

Technical Specifications

Model: W6	Standard: Qi
Input: DC 5.0V/2A	Output: DC 5.0V/1A
(Fast charge)Input:9V/1.67A	(Fast charge)Output:9V/1.1A(max)
Conversion Rate: 75%	Size: 93mm(Φ) * 5.8mm(H)
Weight: 173g	

Method of use

1. Plug the standard USB end to the AC adapter. The led indicator will flash.
2. Put your device on it to start a charge and the light will be steady on.
3. If something wrong, the led indicator will keep flashing or the plate will switch off automatically.

Notes

1. Please use an qualified AC adapter.The input of the wireless charger is DC 5V 2A or 9V 1.67A,insufficient input current may cause unstable charging.
2. Do not place too close with magnetic stripe or chip card (IDcard,bank cards,etc.) to avoid magnetic failure.
3. Make sure the plate doesn't get too hot. If the plate is too warm, take your phone off the plate, and switch the plate off.when the plate has cooled down try charging again.

Safety instructions

1. Do not disassemble or throw into fire or water, to avoid causing a short circuit leakage.
2. Do not use wireless charger in severely hot, humid or corrosive environments, to avoid circuit damage and occurs leakage phenomenon.
3. Please keep the distance at least 20cm between implantable medical devices (pacemakers,implantable cochlear,etc.)and the wireless charger, to avoid potential interference with the medical device.  
This equipment should be installed and operated with minimum distance 15cm between the radiator & your body.
4. To take care of the children, to ensure that they won't play the wireless charger as a toy, to avoid unnecessary accidents.

FAQ and Solution

1. Why the led indicator keep flashing and my phone do not receive any charge?  
-Please make sure your mobile device is Qi-standard supported .  
-Make sure you find the right charging position.  
-Make sure you use an qualified AC adapter.
2. Why it charges slowly than my original adapter came with the mobile device?  
It depends on the reciever in your phone. The let-through current of built-in coil phone or external receiver coil is different.
3. Is radiation from wireless charging harmful to one's heath?  
The W6 wireless charger emits non-ionizing radiation which is not harmful to humans.
4. My device is hot while charging, is it normal?  
If you don't charge your device in a good charging area ,the heat dissipation may not good and it will cause your phone hot during charging. W6 has overheat protection function.

Warranty

We provide all our customers 12 months warranty from the date of purchase.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
