

User Manual

1. Pair iTalkie (displayed as “智讯易达智咪”) with your phone or tablet

2. Pickup the phone call

Pressing the power button shortly will accept the call. Please note you have to keep pressing PTT button when talking.

3. Adjust the volume

Press + to volume up and - to volume down.

4. Low battery alarm

When you hear “dudu”, which means the battery is almost drained out, you need to charge the device.

5. Charging iTalkie

Any adapter with 5V DC output can be used to charge iTalkie.

When charge cable is plugged in, red led will go on. Once battery is fully charged, red led will go off to indicate the completion of charging. iTalkie can work as long as 3 days once fully charged on average.

Do NOT charge iTalkie other than 5V DC, it will DAMAGE iTalkie.

FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
