

# Instruction Manual

To customers:

We greatly appreciate your trust in us. We will serve you wholeheartedly. To give full play to the functions of your product, we recommend that you read the instruction manual thoroughly before making connections and operating. This will help you master the safe use of this product.

Product Name: PowerBug

Model: PBQ2-US

Input: 100-240V~50/60Hz 1.0A Max

qi2 Wireless output: 5.0V=3.0A, 9.0V=1.67A 15W Max

USB-C Output: 5.0V=3.0A, 15W, 9.0=3.0A 27W

15V=2.0A 30W, 20.0V=1.75A, 35W Max

USB-C+qi2 Wireless Output: 20W+15W, 35W Max

Attention: For safety reasons, please carefully read the instructions on this page.

Warning! To reduce the risk of fire and electric shock, do not expose this power adapter to rain or moisture!

When using this product, please use it in a well - ventilated environment to facilitate heat dissipation.

Important Safety Measures:

1. Power Supply: This product can only be used with the type of power supply indicated in the instruction manual or marked on the product.
2. Beware of Electric Shock: Never insert or unplug this product with wet hands to avoid electric shock accidents.
3. Place in a Well - ventilated Area: When using this product, ensure there is sufficient ventilation space for heat dissipation.
4. Watch Out for Moisture and Dust: Avoid placing this product in areas with high humidity or excessive dust, and prevent water splashing.

9. This series of products uses fuse resistors as protective devices.

10. The maximum ambient temperature allowed by the technical specifications of this series of products is 25°C. Please use it in an environment below 25°C.

## FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radiofrequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
