

ID Label Artwork for FCC and IC

The following depicts a label which will be affixed to the non-connector side of each module:

FCC ID: 2AS58-BT01

IC: 24976-BT01

Note that the module is 15x 15mm and the label will be sized horizontally to fit on the module without blocking the module, LED lights, or connection through-holes. The text will be as large as practically possible based on the size of the module, the label will be 11 x 3 mm.

The label will be printed on a permanent tag and fixed with permanent adhesive (i.e. the label will not be erasable or easily removable). Mockup below:
