FCC ID:2ASIN-994725 (IC ID: 25850-994725)

The Inner Range SIFER Pad 994725 is an IP67 rated weather proof NFC card reader with keypad, Designed for external outdoor use in harsh environments.

During manufacturing the device's Printed Circuit Board (PCB) is enclosed into the external plastic shell, this is then completely filled with black liquid epoxy potting compound. The device is then baked inside an oven in order to harden the epoxy leaving only the 4 core RS-485 interface cable exposed.

Therefore there is no possible way for the end user to open or dismantle the product in order to visually inspect or identify the PCB. In the event the device becomes faulty it is then simply disposed of.
